

Daiminta

Tonic complex

Daiminta Tonic Zn

SL

Liquid fertilizer contains high concentration of zinc complexes on Lignosulphonic Acid.

Composition	W/V%
Zn	9.6
Lignosulfonic acid	18.7

Features

- Prevent and correct zinc deficiencies
- helps in activation of enzymes and promoting growing hormones
- Ability to increase offshoots in cereals crops which increase production
- Works on regulating internodes and increase green buds formation
- important for carbohydrate metabolism and also involved in photosynthesis
- Safe use in all crops growing stages especially in fruit formation and coloring.
- works as fertilizer to all kinds of crops

Daiminta Tonic Mn

SL

Liquid fertilizer contains high concentration of Manganese complexes on Lignosulphonic Acid.

Composition	W/V%
Mn	9
Lignosulfonic acid	11.6

Features

- Prevent and correct manganese deficiencies
- helps in activation of enzymes and promoting growing hormones
- Regulate the processes of oxidation and reduction
- Involved in photosynthesis
- Safe use in all crops growing stages especially in fruit formation and coloring.
- works as fertilizer to all kinds of crops

Daiminta Tonic Fe

SL

Liquid fertilizer contains high concentration of Iron with Sulfur complexes on Lignosulphonic

Composition	W/V%
Fe	6.1
S	3.3
Lignosulfonic acid	18.4

Features

- Prevent and correct iron and sulfur deficiencies
- Chlorophyll formulation due to relationship between the supply of iron and the chlorophyll content
- Regulate the processes of oxidation and reduction
- Creating Amino acids and Protein metabolism
- Involved in photosynthesis
- Safe use in all crops growing stages especially in fruit formation and coloring.
- works as fertilizer to all kinds of crops

Daiminta Tonic Cu

SL

Liquid fertilizer contains high concentration of Copper complexes on Lignosulphonic Acid.

Composition	W/V%
Cu	9.8
Lignosulfonic acid	16.5

Features

- Prevent and correct copper deficiencies
- helps in activation of enzymes
- Regulate the processes of oxidation and reduction
- Nitrogen fixation and protein degradation
- Metabolisms of cell walls
- Safe use in all crops growing stages especially in fruit formation and coloring.
- works as fertilizer to all kinds of crops

Daiminta Tonic TE

WSG

Solid fertilizer contains high concentration of Trace elements complexes on Lignosulphonic Acid.

Composition	W/W%	Composition	W/W%
Sulfur S	11.9	Copper Cu	0.5
Iron Fe	4	Boron B	0.5
Zinc Zn	4	Molybdenum Mo	0.5
Manganese Mn	4	Lignosulfonic acid	6
Magnesium MgO	4	Citric acid	5.1

Features

- Prevent and correct several trace elements deficiencies
- Involved in photosynthesis
- Safe use in all crops growing stages especially in fruit formation and coloring.
- works as fertilizer to all kinds of crops

Daiminta

Tonic Mg

SL

Liquid fertilizer contains high concentration of Magnesium complexes on Lignosulphonic Acid.

Composition	W/V%
MgO	10
Mg	6.5
Lignosulfonic acid	15

Features

- Prevent and correct Magnesium deficiencies
- Chlorophyll synthesis
- Regulate the processes of oxidation and reduction
- Involved in photosynthesis
- Safe use in all crops growing stages especially in fruit formation and coloring.
- works as fertilizer to all kinds of crops

Daiminta Tonic Ca

SL

Liquid fertilizer contains high concentration of Calcium complexes on Lignosulphonic Acid.

Composition	W/V%
Ca	14.3
Lignosulfonic acid	3.1

Features

- Prevent and correct calcium deficiencies
- Prevent flower dropping and blossom end rot
- Metabolisms of cell walls
- Safe use in all crops growing stages especially in fruit formation and coloring.
- works as fertilizer to all kinds of crops
