Commercial, Office And Residential

Service Areas: Birmingham & Tuscaloosa

Thank you for choosing Magic City Clean-Out for your COVID-19 deep cleaning/disinfecting and sanitizing protocols. Before your Magic City Clean Out disinfecting and sanitizing treatment, please be sure to clean the area(s) using your usual cleaning process. This is necessary to remove any visible dirt, debris, soil, dust, clutter, as well as, remove food from the surfaces. Remember, cleaning doesn't get rid of germs, but it can eliminate most germs by removing visible debris.

It's important to remember that, YOU cannot sanitize or disinfect an area, if it is visibly dirty. Cleaning all areas, especially high traffic areas, is always the first step to begin the Magic City Clean Out disinfecting and sanitizing 5 Step Process.

The Magic City Clean-Out's 5 Step Process

RESPOND - ASSESS - SANITIZE - DISINFECT - DRY

RESPOND: Magic City Clean-Out will promptly **RESPOND** to your request or inquiry, schedule a free on-site or virtual consultation with our Emergency Technicians, discuss your business needs, requirements, and confirm the scope of work (SOW). The **RESPOND** stage includes, verification that client(s) meeting with Emergency Technicians have not been exposed or experiencing any COVID 19 symptoms (fever, difficulty breathing, loss of smell, loss of taste, fever, etc.), creating your business profile, approval of SOW, scheduling ongoing service (if needed), documenting any risks, issues, mitigation strategies, identification of anyone with or COVID 19, and once on-site, we will upload your profile and information to Magic City Clean-Out's virtual cloud, secure site. We will finalize all requirements, ongoing services, and approved SOW to schedule your initial disinfecting and sanitizing treatment.

ASSESS: Upon arriving at your business site, we will visually **ASSESS** any and all safety concerns to begin the mitigation protocols, to minimize further spread or cross-contamination. We will continue to **ASSESS** and **REASSESS** problems and safety issues throughout your treatment and future visits, to ensure we are delivering quality service, every time!

SANITIZE: a chemical process that lessens and/or kills 99.999% of bacteria in 30 seconds during the initial chemical application. **SANITIZING** is mostly used in bar and restaurant facilities, where areas must be treated quickly. Magic City Clean-Out's Team will begin the **SANITIZING** process promptly, which depends on the type of service you need. The **SANITIZING** services may include ULV fogging. *Fogging disinfects and kills human coronavirus both on surfaces and in the air. But, the area(s) will need to remain uninhabited during the disinfection process.*

DISINFECT: **DISINFECTION** kills ALL organisms in 10 minutes during the chemical treatment process. **DISINFECTING** requires a more dwell time in order for the virucides to reach maximum effectiveness.

The Magic City Clean-Out's Team **DISINFECTING** process will focus on high touch areas:

- Tables
- Doorknobs
- Light switches
- Countertops
- Handles
- Desks
- Phones
- Keyboards
- Remote controls
- Vending machines
- Railings
- Elevator buttons
- Toilets
- Appliances
- Faucets and sinks
- Gas pump handles
- Touch screens
- ATM machines

DRY: Once Magic City Clean-Out has successfully completed the disinfecting and sanitizing, the building should be left uninhabited for 30 min to an hour. This **DRYING** time will allow all areas treated to properly and thoroughly **DRY**. After one hour, it will be safe for humans and pets to return inside the building.

Upon completion of our treatment service, you will receive a Certification from Magic City Clean-Out with your information, date of service and signature for your documentation.

Certificate

OF COVID-19 DISINFECTING & SANITIZING TREATMENT
