

PHYSICS

Testimonials for Logan's Physics Home Education

“Do it, your child will meet new people, work as a team, solve problems and most of all have fun.”

Tracey Mother of participant

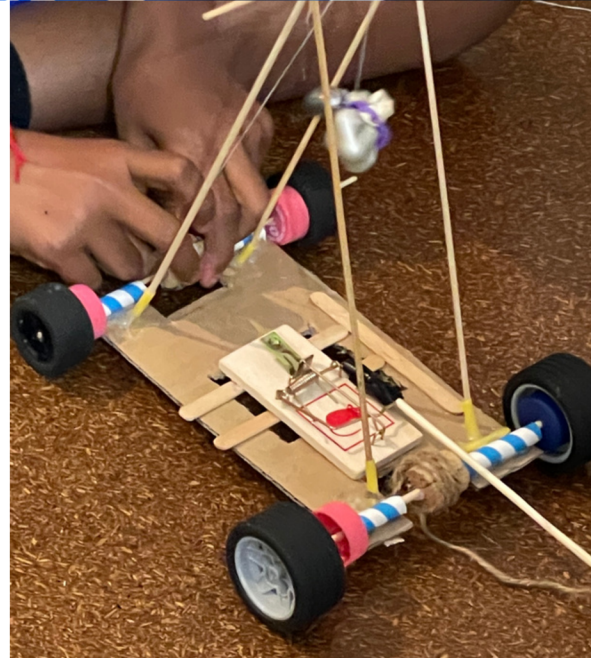

“Logan did a great job leading the boys, setting good examples, allowing them to choose whether to engage or not, yet boundaries were set and boys had to decide whether to be team players or not. By the end of the term I saw so many changes with each boy. Some became obvious leaders, some were great contributors, even the small changes such as engaging and communicating with the others in the group was a big deal. Each child is on their own journey. The workshop helped me to identify my child's strengths and showed me some struggles I was not aware of.”

Cassandra Mother of participant

“Shift to Unleash is a unique program run by a leader that understands how to bring a group together, provides encouragement and supports creative and positive thinking in all participants.

My son learnt more about the workings of powering a vehicle and did it in a fun and practical way in an encouraging environment.”

Mother of 17 yo Male participant
