Why Industrial Wastewater is a burden on Pakistan Economy?

The well-being of any nation depends on many factors, but among the most significant is water and air quality for human consumption. Water brings fingerprints of any substance it gets in contact with. Poor implementation of the state laws caused an unfortunate situation that industries, hospitals, poultry, dairy, butcher houses, restaurant wastes, and construction industry consumption added significant wastewater into the fresh reservoir. Industrial wastewater consumption by dairy, poultry, humans, fishery, wild animals and birds. Therefore, industrial wastewater violations caused the ecosystem in great danger, and it added significant stress on the economy and human toll of any country. In the developed countries courts fined those who have violated the industrial water management. Industry needed training and access to the most suitable solutions. Tectevo is available to offer its consultation, and right solutions to local industries. Tectevo will be a local manufacture the coagulants to supply local solutions and play a role to save the ecosystem through industrial waste management.
