Vitreous enamel explained:

What is Vitreous Enamel?

Vitreous enamel, also known as porcelain enamel or glass enamel, is a branch of the Ceramic Industry. The composition of the coating consists of similar chemicals that are used in the manufacture of glass. These chemicals are permanently bonded onto the steel at high temperatures (830 deg.C). In effect it creates a coating of glass on steel which is very tough and durable.

Benefits of Vitreous Enamel Signage

Bright & glossy colours – remains attractive over decades of use
maintenance free (needs only to be wiped clean with a little solvent)
Resistant to heat & fire up to 500 degrees C.

1. Coating is very tough & durable
2. Weather & acid resistant
3. Scratch & corrosion proof

NEXHUB

Who we are?

In the year 1949, One single man Hafizur Rehman started Pioneer Civil Engineering Instruments Works in the city of Roorkee, Uttrakhand. The factory was then located to the small suburb of Roorkee in 1955 and named as Sunrays Optical & Instruments Corp. The man has given 100's of engineering instruments to IIT Roorkee, Local Indian big survey industries and suppliers across India. Later Sunrays was renamed as Nautical Exclusives Hub India in 2013 expanding its business in the field of export regarding Vitreous enamel signs reproduction and Nautical and other customized gifts and décor reproduction giving the best quality to its overseas buyers across the globe. The pioneer behind this is Mr. Hafizur Rehman.

His son Suhail Rehman continued the legacy of his father's work and gave numerous new ideas and developments to the gifts and reproduction vintage line of which he mastered Vitreous enamel nostalgia signs across the globe. Our primary focus is manufacturing reproductions of vitreous enamelled Nostalgia & Vintage Signage. We specialize in cut- to-shape signage. These items have been exported to the USA, UK, Germany, Holland, Australia, etc. Additionally, we manufacture sign plates (namely Danger Boards, Number Plates, Phase Plates, Circuit Plates) for various structural engineering companies for their transmission line projects. Through these companies, our products have been exported to the Philippines, Malaysia, Indonesia, Egypt, Ethiopia, Sierra.

- We're tightly connected with our communities.

Dedicated Teams

Committed to helping its clients reach their goals, to personalizing their experiences

Global Know-how

They aren't yet aware. we adopt progressive approach to technology and marketing techniques

Focus On Innovation

This sense of identification also means we value and promote seamless interaction

True Partners

Our strong sense of identification with client projects means that we are constantly striving
