

Planned Design

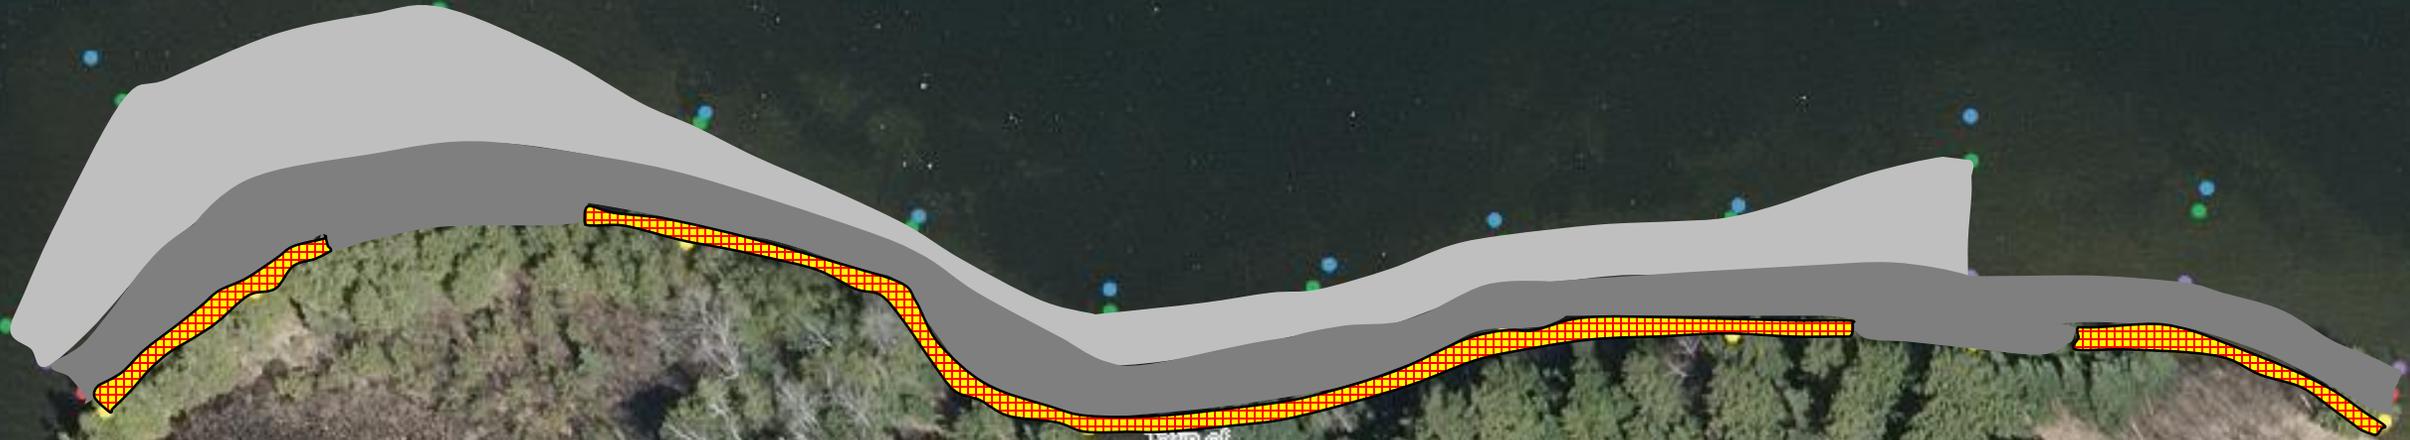

9" of Rock

9"-3" Tapered Rock

No Rock Deposited (Sensitive Area)

Town of Nashville

Installation 3/4-6/2019

9" of Rock

9"-3" Tapered Rock

Entire Reef Size			
Total Area (ft ²)=	34532	Total Volume (ft ³)=	23355
Total Area (acres)=	0.792745638	Total Volume (yd ³)=	865

The area estimate should be as close to exact as we can get. The volume estimate is if the rock was the exact thickness planned for, obviously tapering was not exact, and there are probably some areas where the rock was slightly thicker than planned for. That is why the volume estimate here is less than the estimated 986 yds the contractor delivered.
