

FISH SUBMISSION QUICK GUIDE

MAKE SURE YOUR PHONE AND APP ARE READY

iPhone

iOS 17.4

iOS is up to date

or

Android

Android version

13

Update your phone
Make sure your cell phone is updated with the latest operating system software available.

Enter the FREE eTournament Fishing Practice event

Complete a few test submissions to confirm compatibility and to familiarize yourself with the submission process.

CHECK-IN to your event

Tap the Check-in box anytime prior to the start of your event while you have good cell service/internet connectivity.

HOW TO SUBMIT FISH

STEP 1

Tap Submit a Fish

Submit a Fish!

or

Submit a Fish

If you are in an area with poor or no cell service, the app will automatically go into the offline mode for the submission.

STEP 2

Select the Fish Length

Use the drop down to select the length of your fish in 1/4 inch increments. If the tail touches or crosses a gradient line, you are allowed to round up to the next 1/4 inch.

STEP 3

Take the Measurement Photo

Tap the screen to focus your camera. The nose/mouth must clearly be touching the bump end of the board and the tail must be in focus for the director to easily review. It takes approx. 5 seconds to save the photo to your photo gallery and add a distinctive watermark.

STEP 4

Take the Release Video

Make sure your timer is counting! The release video must show the fish being lifted off the board and released completely back into the water.

STEP 5

Tap SUBMIT FISH

This completes the fish submission and the app will automatically start to upload the submission to the tournament director for review.

MONITORING YOUR SUBMISSION UPLOAD STATUS

Being Uploaded → Pending Review

Uploading typically takes approx. 1-2 minutes in areas with good service, longer in area with poor service.

Monitoring the uploading status

Leave the app open to allow it to complete the upload process. Once the status changes to Pending Review, the director has that submission. If you are submitting fish in the offline mode, your submissions are safely stored in the app and you can just keep fishing. Once you return to an area with good service, open the app, go to Tournament Day and your submissions will upload automatically. The app **MUST** be open for the uploading process to occur.
