## TRAVELLER'S CHEST

For the Traveller in your life! At Ranch Revival, when it comes to our furniture pieces, we're interested in selling meaning. Whether that be a one of a kind bed from up-cycled dead wood, or, something like this...

It may just look like a chest, but it's actually an adventure. This is a checklist for the traveller in your life, to mark off all the places they explore. Once they return, they keep the mementos they bring with them in here.

So someday, when we're all a little wiser and a little slower, and the only trips we feel like taking are down memory lane, we can open it up and make it a little easier for ourselves to go back.

This detailed old time world map is carved with a CNC Router. The ocean and continent lines are stained with an ebony colour, giving depth to the map. We router the edges of our lids to give a more refined look.

With this particular chest we stained it with Early American, however we wanted it darker so we did a light second coat with Espresso. To further add depth to the lid, we stained the continents lighter with Early American.

The front of the chest has branded numbers and letters, we brand the wood with our handmade brands. This chest is finished with manila rope handles as well as matte black corner brackets and strapping.

# RANCH REVIVAL CUSTOMIZABLE OPTIONS
