

Red Button Lockdown Solutions

Proven Life-Safety & Security Solutions For Educational Facilities

Working Together To Create Safe Learning Environments For Future Generations

Secure Students At The Press Of A **Button**

FAST

There's nothing quicker and easier than pressing a **red** button to lockdown a classroom at the first sign of danger.

The person closest to the door is now capable of enacting a lockdown in under a second. The teacher can focus on gathering students into the safe haven area.

EASY

The **red** button is always on the door. It's not a device which has to be lifted in place.

A key or fob is not needed to lockdown the classroom.

Staff and first responders can always enter by key; no special tools or procedures necessary.

SAFEBOLT™ *Patent Pending*

Code-Compliant Barricade Lock

SAFEBOLT™ is the fastest way to barricade a classroom door while maintaining 100% code compliance. Anyone in the room can press the red button and project a 1" locking bolt to secure the room. SAFEBOLT™ retrofits to existing cylindrical lever locks, making it affordable and easy-to-install.

Keyless Instant Lockdown

- No scrambling to find the classroom key, simply press the red button

Retrofits To Existing Cylindrical Locks

- Cost Efficient: Keep existing cylindrical door locks and keying systems by mounting the SAFEBOLT™ over the existing lock with the collar and adapter ring

Superior Intruder Protection

- Full 1 inch throw stainless steel locking bolt and latch

High Visibility Indicator

- The visual indicator notifies occupants that the door is bolted

Free Egress

- A single motion retracts the bolt and latch from the inside at all times
- ADA compliant, meets all applicable life-safety codes

Keyed Entry

- Staff and first responders can always enter by key
- No one is ever locked in

Easy to Install

- Inswing and Outswing models available
- Thru-bolted assembly
- Metal installation template ensures smooth installation

Certifications

- SAFEBOLT™ is approved to be used as an auxiliary component in a Fire Door Assemblies with up to 3-hour rating

Life-safety codes require one action to exit - pulling down the lever. **Red** button locks respect this requirement, even when the emergency locking bolt is thrown.

You can always exit the room safely - no one is ever locked in. Keyed entry meets code requirements.

QID™

Quick Intruder Deadbolt Lock

QID™, Quick Intruder Deadbolt Lock, is a method of immediately securing rooms by pressing the red button, projecting a deadbolt and locking the lever.

Keyless Instant Lockdown

- No scrambling to find the classroom key, simply press the red button

Superior Intruder Protection

- Full 1 inch throw stainless steel deadbolt and latch
- Vandal resistant slip-clutch
- Deadbolt locking instead of latch

Visual Indicator

- The visual indicator notifies occupants that the door is deadbolted and the outside lever is locked

Free Egress

- A single motion retracts the deadbolt and latch from the inside at all times

Keyed Entry

- Staff and first responders can always enter by key.
- No one is ever locked in.

Additional Features & Options

- Locking styles, electrification, touchbars, retrofit and new construction options
- Different functions are available to meet K-12, university, or office needs

Certifications

Fire Door Applications:

- QID Series locks certified to be used on steel, composite, or wood fire doors, that are listed and rated up to and including 3 hours
- Maximum Door Opening Sizes: QID-M – 4' x 8', QID-C – 4' x 10'

Applicable Standards:

- NFPA 252 (2012) Standard Methods of Fire Tests of Door Assemblies
- UL 10 (c) (R2015) Standard for Positive Pressure Fire Tests of Door Assemblies

LEXI™ Lockdown

LEXI™ Electric Lockdown | Applications

Access Control To Multi-Door Facilities

Use Existing Exit Devices

LEXI™ Lockdown offers enhanced safety and security in larger multi-door spaces. LEXI™ Universal Access Control trim works with all major manufacturers exit devices and allows you to bring instant keyless lockdown to your otherwise mechanical hardware.

Schools get to keep their exit devices, can integrate access control, and by simply adopting an electric exterior handle, they can commence lockdown of multiple entrances at once. While these locks function as everyday passage locks in the day, the exit devices can be secured instantly in case of an emergency.

LEXI™ mounting plates simplify retrofit field installation. Mounting plates and operators change to match the exit device; the basic electrified lever handle unit allows for a consistent and clean aesthetic.

Keyless Instant Lockdown

- No scrambling to find the key and lock multiple doors, simply press the remote button, the pendant, or press the emergency lockdown push button in case of an emergency

Heavy-Duty, Stainless Steel Lever

- Stands up to abuse; will break away when forced and is easily reset by lifting up the lever
- Deadbolt locking instead of latch

Visual Indicator

- The LED light notifies occupants that the door is secured and the outside lever is locked

Free Egress

- A Single motion retracts the deadbolt and latch from the inside at all times
- ADA compliant, meets all applicable life-safety codes

Keyed Entry

- Staff and first responders can always enter by key
- No one is ever locked or barricaded in

Additional Features & Options

- From locking styles, touchbars, to retrofit and new construction, LEXI™ Lockdown series is customizable
- Fail-secure and fail-safe models available

Consistency

- Sleek and consistent aesthetic exterior lever

Certifications

- Available for use with Fire Exit Hardware

LEXI™ Trim for Exit Devices

How It Works:

Pressing the lockdown button from any station or turning the red turnpiece on the exit device locks all of the doors and turns the LED red.

Pressing the lockdown button again from any station resets the system to the state it was prior to the lockdown (locked or unlocked lever).

RACHIE™ System: Vestibules & Double Entry

RACHIE™ entry and exit control systems expand on the basic mantrap or sallyport system. By using dual-locking technology, Securitech can create systems that provide operational security & meet special operational and life-safety needs.

Entry & Exit Control Systems Provide:

- Basic two door packages
- Custom two, three, or more door systems
- Fail-Secure & Fail-Safe options
- Dual Security: Mechanical & Electromagnetic
- Custom Operating Scenarios
