## 5. Exploring Consciousness

July 20<sup>th</sup>-22<sup>nd</sup>

This workshop will have a very special beginning. The opposition of Pluto in Aquarius and Jupiter in Leo will happen during the first session. It is more powerful when a group experiences it together.

We will also explore the different levels and functions of consciousness. This will bring understanding to these levels and practical skills on how to use them. We will use different tools such as Tumo, memories, and even poetry, so we can access different levels of consciousness.

*Note that this class starts at 9:00am so we have plenty of time to prepare for the planetary event at 9:45am CDT.*

## **10. Fabulous Energies of 2027**

November 14<sup>th</sup>

We will be looking back on how we survived 2026 and how we can use some of those skills in 2027. The intensity of 2026 will continue in 2027 and will help us grow on many levels, find new ways of being and expand our horizons. We will focus on two major dates:

1. A minor grand trine from June 7<sup>th</sup> to 17<sup>th</sup> of Pluto, Neptune, & Uranus. This brings transformation of religious beliefs and cultural changes. It affects society as well as individuals. This is second of these minor grand trines and they will stay connected for several more years.
2. Jupiter Squares Uranus on September 10th will help us open to new and more expansive beliefs and ways of being. This is a great time to open up to new possibilities. Some persons will experience major shifts.

Throughout 2026 some persons may already be working on new ways of being, even cleaning out, organizing, that almost appears to be preparing for something big. In this class, we will explore how the shifts and changes in energies from the cosmos can help us become a new version of ourselves.
