

Dutch Conrad
Program Manager

Our Purpose

Our purpose is to efficiently operate and manage conversion facilities, conduct UF6 operations, maintain assigned facilities, and provide essential infrastructure services, all guided by our OnePPPO vision and the integration of industry best practices.

Our Vision

MCSA is committed to successful plant operations and the delivery of high-quality site landlord and utility services to all site contractors. Our team is committed to making a real and lasting improvement in the risk reduction of the cold war legacy left by the gaseous diffusion plants at Portsmouth and Paducah.

Our Community Commitment

MCSA is committed to being a driving force in our host communities. We embrace the opportunity to make a meaningful impact of those who work at our sites and reside in our neighborhoods. We will achieve this through educational outreach, regional purchasing and economic development, as well as supporting local and regional businesses to help them thrive. Our commitment to the community involves investing our time, energy and financial support.

Who is MCSA

Mission Conversion Services Alliance, LLC (MCSA) member companies, comprised of AtkinsRéalis, Westinghouse Government Services LLC, and Amentum, supported by our Teaming Partners— Swift & Staley Inc. and Akima-Centerra Integrated Services, LLC have joined together to form a uniquely qualified conversion and mission support company.

MCSA is honored to have been selected by the U.S. Department of Energy's (DOE) Portsmouth Paducah Project Office (PPPO) to deliver DOE's vision of aligning production and mission support through performance of the Operations and Site Mission Support contract at the Portsmouth, Ohio and Paducah, Kentucky facilities.

Our Mission 1st approach delivers reliable on-demand services—ensuring the primary PPPO missions of site operations, Decontamination & Demolition, and Deactivation & Remediation are enabled to safely deliver our respective scopes of work.

Our Framework

Our framework will synchronize the policies and procedures of both Portsmouth and Paducah, ensuring a unified approach to cross-cutting programs. This alignment will improve efficiency and facilitate the sharing of lessons learned across both sites.

Built on our in-depth understanding of the scope of work, the framework clearly defines roles and responsibilities, ensures the appropriate integration of programs and procedures, and emphasizes respectful partnerships with DOE, our employees, communities, and other site contractors.

As PPPO advances Decontamination, Demolition, and Remediation initiatives throughout the enterprise, MCSA will continue fostering a unified OnePPPO culture, intentionally building on the strong tradition of collaboration established among the Gaseous Diffusion Plants. By applying lessons learned, we aim to improve real-time information sharing among our sites, contractors, workforce, regulatory agencies, and communities.

Our focus remains on collaborative efforts that effectively increase benefits for PPPO's cleanup projects, supporting our communities and maximizing taxpayer value.
