

Enhanced Trauma-Informed Care Training

Trauma-informed care (TIC) is a complex subject, and your staff may already be familiar with the basic concepts.

Dr. Harper goes beyond checking the box, guiding your organization to connect TIC and Diversity, Equity, and Inclusion (DEI) principles.

Practice staff will leave with renewed energy to integrate *enhanced* TIC into your everyday operations and long-term goals.

Achieve new must-pass PCPCH standard 6.E.O

Starting in 2024, Oregon's Patient-Centered Primary Care Home (PCPCH) program includes a must-pass requirement that all staff and providers are trained in delivering culturally appropriate, trauma-informed care.

This training meets all PCPCH requirements, and more!

Lauren Harper, PhD

Licensed Psychologist
Associate Consultant
