**RE: Evidence of Washington State Election System Mismanagement
Request for Legislative Investigation**

Honorable State Representatives,

Over the last several weeks, I have been deeply troubled to have found irrefutable written evidence from the office of Secretary of State (SOS) Kim Wyman that confirms mismanagement of our states election system.

As you will find documented in the attached email correspondence, first hand evidence is attached that confirms pervasive mismanagement of our states election system and that intentional neglect of duty by multiple state and county election officials has occurred.

Specifically included in the attached documents you will find evidence that confirms that Voter System errors and defects have not only been neglected to be tracked by election officials, but that the intentional refusal to maintain a record or data base of system problems reflects a willful desire to obstruct meaningful oversight of our states elections by the state legislature and the public.

I cannot overstate the significance of what the attached documents confirm and must reiterate that what I have found supports concerns that the integrity of not only this most recent election has been jeopardized, but possibly that multiple elections throughout multiple years may have had systemic voter system problems impacting the outcome of multiple elections.

Accordingly, based on the overwhelming evidence I have attached, I request a suspension of all state election certifications and a thorough legislative investigation into election system errors and defects occur before the certification of 2020 election results.

Sincerely,

A handwritten signature in blue ink, appearing to read "Cody R. Hart", located below the "Sincerely," text.

Cody R. Hart
