**RE: Cody Hart for Congress Improper Election Pamphlet Information Disclosure
Request for Information from Secretary of State**

Ms. Wyman,

In your most recent correspondence with my campaign, your office has insisted that the disclosure of my campaign pamphlet information was not intentional, was a result of a vendors programing error, and was quickly corrected after I contacted your office. Unfortunately, the significance of what has occurred is substantial and since your office has not issued a public statement about what occurred, there are many questions that remain unanswered.

I am providing this letter as a formal request from my campaign to your office for supplemental information about the illegal disclosure of my campaigns voter pamphlet information. The requested information and questions for your office are as follows;

- Provide the names of all candidates that had their pamphlet information disclosed prior to the May 22nd pamphlet deadline and provide a copy of the pamphlet information that was disclosed
- For each candidate that had their pamphlet information disclosed prior to May 23rd, provide the name of every state employee who accessed the candidates information
- Provide the business name and contact information of the vendor that produced the programing error associated with the improper release of the pamphlet information
- Provide a copy of the investigation and findings used by the S.O.S. to determine this incident was not intentional along with all investigation documents used to substantiate these findings
- Clarify if the software associated with the voter pamphlet information disclosure has ever been used before by Washington State or another state for a previous election, and if so, by who and for what election(s)

Understandably, my campaign and the public expect transparency from your office to restore faith in the election process. Thank you in advance for your assistance resolving this matter.

Sincerely,

Cody R. Hart
