Cancellation Policy

Our intention at Family Tree is to provide all our clients with the best care we can to help the body return to a harmonic and balanced state. We do our best to run a punctual schedule; part of that is being present and on time for appointments. We understand that obligations can present. Family Tree requests that any appointment cancellation or adjustment that must be made are done with at least 24-hour notice. If 2 scheduled appointments are not attended or cancelled with less than 24-hour notice, Family Tree will require prepayment for all future visits. By signing below, you acknowledge that a practitioner has gone over this policy and you understand the terms of this agreement.

**PERMISSION & AUTHORIZATION FORM REGARDING THE USE OF
NUTRITION RESPONSE TESTING™**

I specifically authorize the natural health practitioners at Family Tree Nutritional Health & Wellness to perform a Nutrition Response Testing(NRT) health analysis and to develop a natural, complementary health improvement program for me which may include dietary guidelines, nutritional supplements, etc. in order to assist me in improving my health, **and not for the treatment, or "cure" of any disease.**

I understand that **Nutrition Response Testing is a safe, non-invasive, natural method** of analyzing the body's physical and nutritional needs, and that deficiencies or imbalance in these areas could cause or contribute to various health problems.

I understand that Nutrition Response Testing is not a method for "diagnosing" or "treating" of any disease including conditions of cancer, AIDS, Infections, or other medical conditions, and that these are not being tested for or treated.

No promise or guarantee has been made regarding the results of Nutrition Response Testing or any natural health, nutritional or dietary programs recommended, but rather I understand that Nutrition Response Testing is a means by which the body's natural organ responses can be used as an aid to determining possible nutritional imbalances, so that safe natural programs can be developed for the purpose of bringing about a more optimum state of health.

I understand that my natural health practitioner does not prescribe or alter medications. Any medication related questions and adjustments must be consulted with your medical doctor. If there is concern for interaction with my current medications this is my responsibility to discuss with my prescribing doctor and/or pharmacist and is not in my natural health practitioner's scope of practice.

I have read and understand the foregoing. This permission form applies to subsequent visits and consultations.

SRT/MSA INFORMED CONSENT FORM

Patient Name:

Telephone Number:

Address:

City & State:

Email:

Background: I desire to be tested to determine possible undesirable reactions to various stressors that are natural constituents of my diet, environment or body chemistry. I understand that the device being used is FDA cleared for Galvanic Skin Response Testing and not intended to directly treat or cure any specific condition, symptom or illness. The practitioner has explained, and I understand, the benefits of receiving stress reduction and relaxation therapy and the direct relationship between stress, illness and disease.

Procedures: I understand that this is a non-invasive procedure (the skin is not pierced). Homeopathic remedies, nutritional supplements and other natural remedies may be used to bring abnormal electrical patterns into equilibrium. I understand the nature of the immune system and related symptoms are of an unpredictable nature and therefore the facility cannot guarantee any results.

Family Tree, their Practitioners, and BioScan SRT/MSA cannot guarantee that new stressors will not contribute toward my health conditions in the future and that in some cases a person may not wholly respond to the treatment.

I choose to be and I understand that this testing has not been scientifically proven to be reliable and that my practitioner must still rely upon my observations as to the efficacy of the test and any treatment based on the results of this test.

Risks: The procedure is very safe because it measures only changes in the electrical properties of the skin. However, since an electrical signal is used there is a slight risk of electrical burn or shock. Skin irritation or redness may occur at the site of the test. However, any discomfort should be brief. There are generally no risks associated with the substances recommended to bring your body to equilibrium as long as those substances are taken as recommended, but please report any discomfort you may experience from taking these substances to your examiner or practitioner. Please report any significant health problems (i.e. Diabetes, High Blood Pressure, etc.) to your practitioner. I understand that there is a risk factor where as a result of exposure to these bio-energetic stressors, that I may experience temporary symptoms not unusual to the regular symptoms currently experienced when exposed to these stressors. I assume all responsibility for the unpredictable immune

reactions that may lead to increased symptoms. I agree to seek immediate medical attention should this occur and understand that this facility does not treat cases of patients suffering from anaphylactic allergic reactions, during pregnancy, neoplasm or cancer, or who have pacemakers, or defibrillators, and I agree to completely disclose all information regarding any life threatening allergies or allergies resulting in anaphylaxis, as well as any of the above prior to undergoing these procedures.

Questions: I have been provided with the opportunity to ask any pertinent questions I have regarding the NanoSRT procedure, protocol or treatment program.

Free to Decline: I understand that I may decline to the testing and therapy.

Important: There is no recognized body of scientific evidence to show that an electrically balanced body is more likely to be healthier and you have chosen to participate in this assessment with that understanding. Your physician may need to use other forms of testing in the course of your treatment.

Payment of Services: You are responsible for the payment of the normal and necessary fees associated with the assessment and services performed as a result of that testing, if purchased in this clinic.

I have read and understand the above information and my rights. I consent to the use of clinical reports and results of my case for study, the purpose of advancing clinical knowledge, research and scientific purposes provided that my identity is kept confidential.

Could NRT Help You?

If you are like most people who come to us for help, then most likely:

- You have one or more health conditions that have become chronic and,
- You have probably tried conventional medicine or even alternative practitioners and did not get the results you hoped for and,
- These conditions are impacting your personal life, your relationships with your spouse or children, your career or job performance, and/or your personal finances and,
- You know that, as time goes by, these conditions are not going to get better and will probably continue to worsen unless you change what you are doing and do something really effective about it.

If this describes you and you are ready to make a real demand for improvement that will put you back in charge of your own health, then you have come to the right place.

If you are a Nutrition Response Testing case and you follow our recommendations to the letter, then there is hope that you will receive the help you need to restore your health.

What is Nutrition Response Testing?

Nutrition Response Testing is a non-invasive system of analyzing the body in order to determine the underlying causes of ill health. When these are corrected through safe, natural, nutritional means, the body can repair itself in order to attain and maintain more optimum health.

Nutrition Response Testing is very precise and scientific. However, if I were to analyze you using Nutrition Response Testing before it was explained to you, you might find it strange, or simply not believable – only because it is probably very different from anything you may have experienced before.

I can understand this because when I first saw this type of work being done, my first reaction was “Hmm, what is this strange stuff?” No one was more skeptical than I was. As a result, I studied Nutrition Response Testing extensively to see if it was for real. And I am sure happy I did because it has greatly helped me improve my health and the health of so many patients. Because of Nutrition Response Testing, we are here and are able to help you improve your health.

If you want to get healthy and stay healthy, it is important that you understand what Nutrition Response Testing is and what our recommendations are based on.

Otherwise, you are less likely to follow through and actually do what you need to do to get well. If you don’t follow through, you won’t get well. And if you are not going to get well, why do it in the first place?

The results we have been having with Nutrition Response Testing are often in the 90% and better range. The only reason we are here is to help you get well. We have no other reason for being here and hopefully, you are here for that same reason. That is why I want to make sure you get the correct understanding of what Nutrition Response Testing is right from the start.

What Makes this Approach Unique?

In medical practice, there are two key parts: the diagnosis (identifying and/or naming the “disease” or syndrome) and the treatment (drugs, surgery, etc.).

In Nutrition Response Testing we do not diagnose or treat disease - but we also have two parts: the analysis (the assessment of your body’s current health status) and the personalized health improvement program (using designed clinical nutrition).

Simply put, first we do an analysis, and then we design a natural health improvement program to help you handle what we find in our analysis of your body and condition.

First the Analysis.

The analysis is done through testing the body’s nervous system.

Nutrition Response Testing analyzes different areas on the surface of the body that relate to the state of health and to the flow of energy in each and every organ and function of the body.

This information is derived from the part of the nervous system whose job it is to regulate the functions of each and every organ.

Interestingly, since the human anatomy has not changed significantly in thousands of years, the utilization of these organs / areas have become extremely useful in our practice because they are so accurate!

Think About It.

Each area that gives a response represents a specific organ, tissue, or function, and indicates the effect that energy, or the lack of energy, is having on the body. By testing these organs / areas, we have a system of monitoring your body at each visit that has proven to be extremely accurate clinically, and that helps us identify exactly what the body needs and how well we are meeting that need.

Doesn’t this sound like something you would want for yourself in order to predict, with certainty, what is needed and wanted by the body to get you to the next stage of improved health?

How Do We Do The Nutrition Response Testing Analysis?

If I were to hook you up to an electro-cardiograph machine and take a reading, that would make perfect sense to you, right?

What is actually happening during this procedure? Electrical energy from the heart is running over the wires. This electrical energy makes the electrocardiograph record the energy pattern in the form of a graph or chart. I could then study this graph and tell you what it all means.

Here is what we do with Nutrition Response Testing. Instead of connecting electrodes to the areas being tested, the Nutrition Response Testing practitioner contacts these areas with his/her own hand. With the other hand, he/she will test the muscle of your extended arm. If the organ/area being contacted is “active” the nervous system will respond by reducing energy to the extended arm, and the arm will weaken and drop. This drop signifies underlying stress or dysfunction, which can be affecting your health.

Why is the Person Who Referred You Feeling Better?

Because we did a Nutrition Response Testing analysis for him or her, we found the “active” organs/areas, and then made specific nutritional recommendations to help the body return to an improved state of health. Most importantly, the person is following through on our recommendations.

We are prepared to do the exact same thing for you now. How does that sound to you? However, the best is yet to come.

Your “Personalized Health Improvement Program”.

Let’s say the liver or kidney areas are active. Then what?

Our next step is to test specific, time-tested and proven, highest-possible quality nutritional formulas

against those weak areas, to find which ones bring the organ/areas back to strength.

Our decades of clinical experience tell us that when we have found the correct nutritional supplements, as indicated by this procedure, and have worked out a highly personalized nutritional supplement schedule, we have identified the most important first step in correcting the underlying deficiency or imbalance that caused the organ/area to be active in the first place. By following the program as precisely as possible, you are well on your way to restoring normal function and improving your health.

It's that simple!

In medicine, the medical doctor makes a diagnosis and then uses drugs or surgery to attack or suppress the symptom, or to surgically remove the "offending" organ or malfunctioning part.

In Nutrition Response Testing we use "DESIGNED CLINICAL NUTRITION" to correct the cause of the problem, so that the body can regain the ability to correct itself.

What is a Designed Clinical Nutrition?

"Designed Clinical Nutrition" is exactly that: **designed** (*especially prepared based on a specific plan*) **clinical** (*pertaining to the results gotten in clinical use or actual practice on huge numbers of patients over many years*) **nutrition** (*real food, designed by nature to enable the body to repair itself and grow healthfully*).

In most cases it is concentrated, whole food in a tablet, capsule or powder, prepared using a unique manufacturing process that preserves all of the active enzymes and vital components that make it work as Nature intended. These real food supplements have been designed to match the needs of the body, as determined by the positive response shown when tested against the active Nutrition Response Testing organs/areas that were found on your individual Nutrition Response Testing analysis. These are nutrients you are simply not getting, or not assimilating, in your current diet.

These deficiencies may be due to your past personal eating habits and routines, but it is for sure due, in some large extent, to the lack of quality in the foods

commercially available in grocery stores or restaurants today.

An example of a whole food could be carrots. Carrots are high in *Vitamin A Complex*. A "complex" is something made up of many different parts that work together. Synthetic vitamin A does not contain the whole "Vitamin A Complex" found in nature. So, if we were looking for a food high in Vitamin A, carrots might be one of our choices.

If one actually were deficient in any of the components of Vitamin A Complex, one would be wise to seek out a supplement that was made from whole foods that were rich in this complex - not from chemicals re-engineered in a laboratory to look like one little part of the Vitamin A Complex that has erroneously been labeled as "Vitamin A."

Designed Clinical Nutrition is not 'over-the-counter' vitamins. Over-the-counter vitamins are pharmaceutically engineered chemical fractions of vitamin structures reproduced in a laboratory. Because they are not made from whole foods, "over-the-counter" vitamins are not "genuine replacement parts" as they lack many of the essential elements normally present in WHOLE foods. [Please ask about our audio CD: *"The Whole Truth About Vitamins,"* for an entertaining, in-depth explanation of this aspect of vitamins and other nutritional supplements.]

Vitamins that are being used all over today generally only need to have a small percentage of their actual content derived from natural sources to be labeled "natural". If they are not derived from whole foods, they often make you even more deficient and nutritionally out-of-balance. They can create other health problems because they do not contain all of the co-factors found in nature that make the vitamins work.

So-called "scientific research," done with these shoddy substitutes, repeatedly "proves" that vitamins don't do much good for anyone! Can you imagine who pays for these "researches"?

SUMMARY

1. Through an analysis of your body's organs/areas, we help you to determine the exact nutrients you need to supplement your diet, in order to bring about balance and better health.

2. We make these highly concentrated therapeutic formulations available to you in tablets, capsules, or in powdered form to “supplement” your current diet. That’s why they are called “food supplements.”

3. Depending on your individual situation, we might also require that you make some specific changes in your diet & eating habits, and in your routines, in order to bring about the best possible results.

How are These Products Produced?

One example of a designed clinical nutrition supplement that we use is called “Catalyn”. This product is produced by starting with a wide variety of carefully chosen organically grown vegetables, taking the water and fiber out using a vacuum, low heat process - without heating or cooking the vegetables, and then utilizing the concentrated food to make a bottle of Standard Process Catalyn Tablets.

The key to this whole procedure is the way it is done, using the “Standard Process” method:

A. Standard Process nutrients are derived from plants grown on their own farms, in soil free of pesticides – and no chemicals are ever used. Ph.D.’s check the soil before the seeds are sown, to make sure of the fertility of the soil – and even the weeding is done by hand.

B. The machinery involved in the processing of these products is made of glass and stainless steel only.

C. The temperature used in processing harvested plants is never raised above the point of 90 degrees Fahrenheit, so that the active ingredients are not cooked; they remain active and alive, and have a very long shelf life.

Your vitality and energy is derived from live food. Most foods available today are dead - or are not really foods at all - as in boxed cereals, canned vegetables, soda pop, etc. You can readily understand the difference between dead, devitalized pseudo-foods, with the synthetic or isolated vitamins on the one hand, and “Designed Clinical Nutrition” and a diet of real foods, on the other.

There is a Great Deal of Technology and Know-How Behind What We Do.

Having been designed through decades of clinical use on tens of thousands of patients, and on patients

from many different types of health care practitioners, you can be assured that Nutrition Response Testing is capable of evaluating and solving your health concerns.

An analysis of your active organs / areas will be performed on each follow up visit. Often these follow up visits also reveal additional layers of dysfunction. These can then be addressed in the correct sequence for your body.

Each patient gets a completely individualized program.

Very much like opening a combination lock, you must use the right numbers in the right sequence and in the right direction at the right time – then the lock opens easily.

Therefore, since every case is different, by following the correct sequence as revealed through Nutrition Response Testing, even the most complicated cases can be handled.

Is it Possible to Restore Your Health?

Many people we see in our practice have eaten themselves into their current state of ill-health, to one degree or another. The deficiencies or imbalances lead to a breakdown in resistance, or immunity, and a loss of the ability to cope with environmental stresses (chemical, microscopic, or otherwise).

So, yes, the **good news** is that it is possible to reverse the process!

What could be more natural? What could be more correct? Each cell, tissue, and organ in your body is in the process of replacing itself every day, month, and year. The health of each organ is dependent on making the correct nutrients available to upgrade or to maintain the health of the body at a cellular level.

Designed Clinical Nutrition provides the right basic materials.

Nutrition Response Testing tells you when and what to use to bring about the desired result.

With this understanding of what we do, can you see how we might be able to help you do something effective to get yourself well?

And once that is achieved, do you see how you might be able to use this approach to stay well?

Now you have the complete 1-2-3 package. You now know:

- What we do
- How and why we do it
- What you need to do to have the potential of restoring your health and staying healthy.

But in the end you are the one responsible for your own condition. And with our guidance, we feel that – if you are a Nutrition Response Testing case – your chances of greatly improving your health can be as high as 90% or better.

How Do You Qualify to be a Nutrition Response Testing Patient?

Our long-term experience in a wide variety of cases tells us the first thing we must determine is whether or not you are a “Nutrition Response Testing Case”. If you are NOT a “Nutrition Response Testing Case”

then it is unlikely that Nutrition Response Testing will ever help you. However, if you are a “Nutrition Response Testing Case”, then, in our experience, it is our belief that nothing else will help you as much.

If our analysis indicates that you are not a Nutrition Response Testing case, then in all probability, while a nutritional program may give you some benefit, it may not give you the maximum results you desire.

We wish you the best of luck in your quest to take back full responsibility for your health. Just remember to do it one step at a time, and that we are here to guide you in that quest.

Once we accept your case, you can count on us to do everything in our power to help you achieve your health objectives, and to help you achieve a healthier, happier life.

May you never be the same.

BioScan SRT MSA

Q: What Is Stress Reduction Therapy?

A: SRT is a remarkable new procedure that combines the disciplines of Acupuncture, Biofeedback and Homeopathy with Laser Light technology. A computerized scan or test is done to see what your body is sensitive to, and how it is out of balance, then help it learn not to be.

Q: What does the NanoSRT/BioScan do?

A: Substance specific frequencies converted to a digital format, and presented in the form of sound and light, are what allow for patient assessment and therapy down to the molecular level. The frequencies are what make it possible to assess thousands of substance sensitivities in mere minutes, then allow the brain and nervous system to record a new association that is positive or neutral instead of the inappropriate ones that were previously stored in memory. This breaks the link between the stimulus and response, makes symptoms unnecessary, creates balance and harmony, from dis-ease and disharmony, and allows the body to function better.

Q: What types of health care practitioners use the Nano SRT?

A: Because the Nano SRT/BioScan is a non-invasive and painless therapy it falls under the scope of practice for many types of physicians, including but not limited to Medical Doctors (MD), Doctors of Chiropractic (DC), Doctors of Osteopathy (DO), Homeopathic Doctors, Naturopathic Doctors and Acupuncturists.

Q: Is the Nano SRT Wellness System safe for both the doctor and patient?

A: Yes. In a very simple analogy, the Nano SRT/Bioscan emits energetic frequencies during an assessment which are essentially no different than sound waves. Our device measures the patient's sensitivity to these frequencies which are no more harmful than frequencies generated by listening to the radio at home or in your car.

Q: Does insurance cover assessment and therapy?

A: At this time, therapy and assessment are provided on a cash basis and are not yet covered by insurance. However, if your insurance offers a Flexible Spending Account (FSA) you may be able to apply the services toward that account.

Q: Why should I pay for this service?

A: Compared to managing your symptoms, and the fact that most other treatments prove unsuccessful, this is a relatively inexpensive, alternative, effective option, that can relieve a lifetime of suffering, in a short period of time. Our goal is to make you well and we will provide care until we clear your symptoms

Q: What does a typical full course of therapy cost?

A: We can tell you is that we have several hundred doctors across the country that utilize the Nano SRT/BioScan within their practice and that charges will vary from clinic to clinic.

Q: How many visits are needed?

A: The number of visits required depends on the patient, the extent or severity of their conditions and their state of overall health and well-being. The Nano SRT/BioScan is comprised of two (2) primary procedures. The first

visit consists of the 100-point Wellness Inspection. This will determine how many visits are necessary. Most patients require on average between 5-7 visits. Patients with complicated health challenges may require a more comprehensive program with additional visits. It is important to note that we encourage patients to receive a 100-point Wellness Inspection every 3 months for continued maintenance, after completion of their recommended protocol.

Q: How long is a typical appointment?

A: The 100-point Wellness Inspection takes between 10-12 minutes. Nano SRT Processing Sessions take approximately 10-15 minutes each.

Q: When do patients notice improvement?

A: Individual timetables to achieve symptomatic relief will vary based on the individual's severity of conditions and state of overall health. Many patients notice an increase in their quality of health after the first or second visit.

Q: Are there any side effects?

A: No. A small percentage of patients report slight flushing or congestion for a short time (an hour or so) after their session, but this is actually a sign that the body is detoxifying (a good thing)! This process is safe, fast, non-invasive and painless. Unlike skin tests the actual substance is not used, so the body perceives its presence, it as if it were there, but does not act upon it.

Q: Is this therapy and specifically the Nano SR/BioScan safe and effective for children?

A: Yes, the Nano SRT/BioScan is safe for people of all ages, and is even successfully used by veterinarians on animals.

Q: What substances can the Nano SRT/BioScan identify as stressors?

A: The Nano SRT/BioScan contains tens of thousands of substances in the main procedure libraries and up to an additional 50,000 substances in the advanced procedure libraries. This technology can identify almost every known substance that could possibly cause a stress reaction. The Nano SRT/BioScan contains some of the most comprehensive substance libraries of any devices of this type.

Q: I have heard of other devices using frequencies or "digital signals" to assess allergies. How does the Nano SRT/BioScan compare to them?

A: The Nano SRT/BioScan is both patented and FDA-cleared for Neurological Relaxation Training or what we call Stress Reduction Therapy. Please read about stress and energy therapy and the direct relationship between stress and allergies as well as other symptoms and illnesses. The Nano SRT/BioScan is unique in that it is fully automated and can achieve objective results for an exponentially greater range of substances in a fraction of the time. The Nano SRT/BioScan is fast, easy, painless, highly accurate, non-invasive and safe -- making it the best holistic device available. Some companies use misleading statements in their marketing, even referring to their product as a "laser allergy treatment". These companies use outdated technology that may not be evaluated by the FDA and has no proven therapeutic benefits. Do your research and make sure your doctor is using the Nano SRT/BioScan. The Nano SRT/BioScan does not treat or cure allergies or any other types of illness or disease.

Q: What does the Nano SRT/BioScan treat?

A: The Nano SRT Wellness System does not diagnose or treat any specific condition. Through the use of our FDA cleared biofeedback technology, the Nano SRT/BioScan is able to assess with a very high degree of specificity which substances create increased levels of stress to the body. These specific stress inducing substances are often times what trigger the nervous systems fight or flight reactions which are expressed in a myriad of symptoms that have been scientifically proven to be associated with high levels of stress. "According to The American Medical Association (AMA), stress is the cause of 80 to 85 percent of all human illness and disease. Every week, 95 million Americans suffer some kind of stress-related symptom for which they take medication." Our belief is that through the use of our state-of-the-art technology, the Nano SRT/BioScan can safely, effectively and quickly reduce stress which will therefore provide for increased health.

Q: How long with the results last after I complete treatment?

A: Results to date are termed indefinite. Patients and Doctors report elimination of symptoms without recurrence in most cases. Because allergies, sensitivities, and other health issues can develop in adulthood, elimination or alleviation of a symptom does not mean other symptoms may not present over time. We

recommend a system checkup every three months for wellness maintenance after you complete your recommended protocol.

Q: What is the Nano SRT/BioScan Focus Therapy Tool?

A: The Nano SRT Focus Therapy Tool provides substance specific stress reduction by emitting energy signals through the body's energy pathways. These energy frequencies train the body to better handle the stressors that had previously resulted in increases stress levels.

Q: How can Stress Reduction Therapy help everyone?

A: Because stress affects EVERYONE

IHT: NanoSRT/BioScanSRT FAQ 7/9/2014

Contraindications:

Please tell Family Tree prior to your initial evaluation if any of the following apply to you as a scan will not be recommended;

Organ Transplant

Pacemaker/Defibrillator

Currently pregnant

History of seizure

Before BioScan SRT Recommendations

Thank you for your interest in Bioscan SRT! Our testing is performed on a punctual schedule, so please be on time. The following reminders will make your visit go more smoothly.

Prior to your appointment please adhere to the following:

- Do not take any supplements or unnecessary medications for night and morning before your appointment. It could affect your reading as falsely positive results from benefits of supplements.
- Avoid eating one hour before your appointment (water is fine, just no food)
- Please **drink a lot of water for at least 48 hours** before your appointment. Half your body weight in ounces is recommended.
- Please do not wear perfume, strong smelling deodorant, fragrances, essential oils, hand lotion, aftershave or cologne on the day of your visit
- Please do not wear an underwire bra
- Hearing aids, key fob, cell phone, and electronics will be removed before the scan
- If an appointment needs to be rescheduled, please do so more than 24 hours in advance
