Main Goal	To provide immediate life-saving assistance and essential relief support to earthquake-affected families and help stabilize vulnerable communities in the emergency phase.			
Summary	In September 2025, a strong earthquake struck Nurgal and Chawkay districts of Kunar province, causing significant destruction to homes and loss of lives. Continuous aftershocks increased fear and vulnerability among affected families. STEP immediately mobilized its emergency response team and provided rapid food assistance during the first hours of the disaster. As the situation continued, an emergency kitchen was established to deliver hot meals for eight consecutive days, serving approximately 585 individuals daily. Following food assistance, clothing support was provided in two separate rounds to address urgent protection needs, especially considering the poor economic condition of the affected families. Through this intervention, STEP ensured timely, organized, and effective humanitarian assistance, helping stabilize the affected communities during a critical emergency period.

Aid Provided	• Construction of permanent residential houses for martyr families in Kunar province. • Ongoing structural work including foundation, walls, roofing, and finishing.			
Main Goal	To provide safe, dignified, and permanent housing for the families of martyrs affected by the Kunar earthquake, ensuring long-term stability, protection, and improved living conditions.			
Summary	Following the devastating earthquake in Kunar province, many families lost their homes and loved ones. Among the most vulnerable were the families of martyrs who were left without adequate shelter and financial support. In response, STEP initiated a housing construction project specifically for these families. The project aims to build durable and safe homes to restore stability and dignity. Construction activities are currently ongoing, including foundation work, wall construction, roofing, and other structural components. The project is being implemented under continuous technical supervision to ensure quality standards and sustainability. Once completed, these homes will provide long-term protection and improved living conditions for the beneficiary families, helping them rebuild their lives with security and hope.
