

ARCHITECT

APARAJITA MITRA

I'm a curious individual who has appreciated every country they have visited. Love to learn from experiences and by interacting with people who have lived different lives. The user of the space helps me deliver the design form and allows the step-by-step integration of the area and its surroundings. My knowledge only expands with each design, and I evolve with challenges put in front of me. I hope to build environments that are safe, sturdy and elegant overall, encapsulating my clients every vision.
