

EX-24: 24-Antenna Handheld Phone Jammer

Key Capabilities

The world's first 24-antenna portable jammer, designed to shield against a vast array of signals:

- **Full Mobile:** 5G, 4G, 3G, GSM, CDMA
- **Connectivity:** WiFi, GPS, LORA, Bluetooth
- **Radio:** UHF/VHF, Lojack, 315-915MHz

Advanced Monitoring

LCD display shows real-time status:

- **Battery Capacity %**
- **Operating Voltage**
- **Current Levels**

Thermal Cooling

High-performance cooling system for safe, continuous use:

- **3 Internal Fans**
- **Powerful Aluminum Heatsink**

EX-122: 12-Antenna Powerful Fixed Jammer

Overview

High-power signal scrambler with a stylish gray design, featuring 12 omnidirectional antennas and infrared remote control. Covers GSM, 3G, 4G, 5G, WiFi, GPS, LOJACK, UHF, and VHF signals.

Product Highlights

- 79W total power, 3-10W per band
- Up to 80m jamming range
- 5 built-in fans for 24/7 work
- Adjustable individual bands
- Independent module design

Target Environments

Ideal for locations requiring high confidentiality and security:

- Meeting & Conference Rooms
- Museums & Galleries
- Concert Halls & Theaters
- Factories & Training Centers
- Public Transport (Trains/Buses)

Meeting Room Signal Jammer

This powerful conference room signal jammer uses a newly developed ultra-high gain 14dBi antenna with a total output power of 150W, effectively interfering with all mobile phone and WiFi signals within a 50-meter radius.

Product Highlights

- 150W output power shielding up to 50 meters
- Shields GSM, 3G, 4G, 5G, and WiFi (2.4G/5.8G)
- 14dBi high-gain antenna for stable performance
- Intelligent cooling: thick heat sink, large fan, and 4-side vents
- Easy wall-mounted installation
- Precise voltage design for stable operation during fluctuations
- Imported IC chip for strong and stable output
- Durable, shatterproof, and weather-resistant PVC/metal shell

EX-12 Ultrasonic Audio Recording Blocker

Discreet Protection

Concealed in a realistic speaker design, the EX-12 prevents unauthorized audio recording without attracting attention.

Target Devices:

- Smartphones
- Digital voice recorders
- Wired/Wireless microphones

Advanced ultrasonic interference is virtually inaudible to humans but renders recordings unusable.

360° Interference

Four side modules deliver comprehensive coverage up to **8 meters**.

Individual module control allows for tailored coverage in meeting spaces.

Power & Control

- **9,800 mAh battery:** 2h use.
- **Wireless Remote:** Simple operation.
- **Dual Power:** AC or battery.

EX-6S OBD GPS Jammer

The EX-6S Anti-tracking GPS Jammer offers enhanced output power to block signals over greater distances, ensuring your vehicle remains completely untraceable.

Driving Safety & Privacy Protection

Universal OBD Interface

5-8m Signal Coverage

Applicable to All Vehicles

HD-3 Vehicle-Mounted Drone Jammer

Signal Interference

Instantly disrupts signal environment targeting GPS, 2.4GHz, and 5.8GHz.

Common Drone Reactions:

- Return-to-home (RTH)
- Emergency landing
- Loss of connection

Power & Range

150W Output Power for consistent suppression.

Range: **300m to 800m** depending on surroundings.

Blocking Technology

Adaptive signal blocking responds to frequency-hopping and encrypted UAV transmissions in real-time.

Portable Anti-Recording Jammer with Power Bank

Product Description

This portable anti-recording jammer effectively combines with a high-capacity power bank to provide multi-layered security.

Key Utility:

- Prevents mobile phones, video recorders, and recording pens from capturing audio.
- Effective interference distance of 1-15m.
- Convenient remote control operation.
- Functions as a temporary mobile power supply for other devices.

Anti-phone recording

Anti-recording pen recording

Anti-monitoring recording

EX-FL1 "flashlight" Portable Drone Blocker

Device Overview

Disrupts satellite navigation, control signals, and video transmission for UAVs within direct line of sight.

Key Features:

- 1000 Lumen high-powered integrated flashlight.
- Protects restricted airspace & sensitive military/civilian areas.
- Effective against drones, unmanned vehicles, and automated systems.
- Simple "point and jam" operation - no training required.
- Internal replaceable battery for field operations.

EX-1704 Portable Backpack UAV Blocker

Description

Specifically designed to disrupt quadcopters used for unauthorized surveillance. Effectively blocks data transmission, interrupts control signals, and disables navigation.

Key Specifications

Power: 170W output with 30,000 mAh battery.

Range: Up to 1,000 meters suppression.

Durability: Sealed casing, ideal for outdoor/remote use.

Cooling: Four fans for continuous operation.

Safety: Internal protective features for electronics.
