

EARLY CHILDHOOD INTERVENTION

Is your child experiencing developmental delays? Or maybe you want to give them extra support during these formative years. Early childhood is a critical time and window of **opportunity for growth and cognitive development.**

Flourish Kids Clinic offers a neuro-informed approach to early intervention, utilizing play-based strategies to support child development and parental attunement.

We offer a variety of play based interventions to:

- **Support emerging skills:** Targeting areas like language development, communication, social interaction, cognitive development, sensory & motor skills.
- **Process early experiences:** Helping children understand & cope with transitions, anxieties, or challenges.
- **Build a strong foundation:** Fostering healthy emotional regulation, self-awareness and confidence.
