

Otis Farmers Market Supply Farmer Verification Form

A supply farmer is a **local** farmer who is providing their product to an existing Otis Farmers Market Vendor, who already provides the market with 75% of their own grown product and has been approved to bring this Supply Farmer's product in to be resold (25%). The supply farmer does not participate in the market and bears NO liability. **The vendor who is reselling their product bears ALL LIABILITY.**

All products being sold from the supply farmer must have accurate signage which gives the location of the supply farm (town and state), and the price of the product. The vendor should not be selling the supply farmer's product as "their own," they need to be truthful with the customer about where it comes from. Supply farm products that are not labeled correctly will be pulled from the vendor's display until done so. Signage is the vendor's responsibility. Vendors are not to "assume" that the OFM needs this product, without first communicating this need to the Market Manager. Only then will this product be allowed.

This verification form is to ensure that the market vendor is buying their product from where they claim. By signing this form the supply farmer is confirming that they have sold their product to this vendor and that their product is local. By the Otis Farmers Market Vendor signing this form they are confirming that they are responsible for bringing this product into the OFM by going through the proper channels. The Market Manager / Board reserves the right to contact the supply farmer to verify this information.
