**40 years ago Dr. Joram Amir, the founder of Piletest, began using NDT (Non Destructive Testing) to perform quality assurance for deep foundations.**

**Back then, at the late 1970's, there were no pile testing specific devices and he used an equipment which was cumbersome and required two people connected by a 100m long data cable. These field experiences, quickly led him to harness state-of-the-art technologies and develop a compact, lightweight and outdoor capable pile testing solutions - the PET (Pile Echo Tester).**

**Together with his son Erez Amir (a software engineer) and a team of electronics engineers, he incorporated Piletest.com Ltd. 20 years ago. Piletest.com is the most innovative player in the pile testing industry, as can be seen by the following achievements:**

- 1st PC-based pile echo tester**
- 1st pile echo tester with digital sensor**
- 1st PC-based ultrasonic cross hole tester**
- 1st pile echo tester with wireless sensor**
- 1st pile echo tester with Android data logger and real-time communication**
- 1st miniature light-weight Borehole Inclination Tester**

## **WATERPROOFING CHEMICALS SALES & SERVICES**

### **OUR PRODUCTS**

**THE NANOTECHNOLOGY WATERPROOFING SYSTEM IS DESIGNED TO PROTECT THE STRUCTURE FOR LIFE USING A COMBINATION OF**

**ZycoSil Max (Organosilane penetrative nanotechnology)  
Zycobond Max (Acrylic co-polymer as a bonding agent)  
Elastobar (Acrylic co-polymer as an elastomeric membrane coating)  
Zycoprime+ (Acrylic admixture compound)  
Cold Bond  
Zyco Fix**

### **APPLICATION AREAS**

- **ALL EXPOSED SURFACES LIKE CLAY ROOF TILES, TILE JOINTS, IPS LAYERS, WALKWAYS, PAVED SURFACES**
- **BASEMENT, SUNKS, MOTHER SLABS, PRE STONE CLADDING, PRIMING BEFORE IPS / PLASTERING / TILES**
- **STONES, PLASTERED & CONCRETE STRUCTURES**
- **EXPOSED BRICKS / FAIR FACED CONCRETE**
- **PRIMING FOR PAINTING**
- **TREATMENT OF HONEYCOMB, CRACKS, COLD JOINTS**

Instrumentation & Solutions

### ZycoSil Max

ZycoSil Max waterproofs all types of siliceous surfaces and makes them water resistant while maintaining breathability.

### Zycobond Max

Zycobond Max is an acrylic co-polymer emulsion, to be used as a bonding agent for excellent adhesion on plaster surfaces.

### Elastobar

The acrylic composition ensures Excellent UV stability, high strength and elongation up to 250% on mixing with cement and sand.

### ZycoPrime+

ZycoPrime+ can be used as an additive for bonding plaster or concrete mixes for improved water resistance and flexibility.

### Cold Bond

Nano Size Acrylic Coploymer (70-90 mm) with very high bond strength.

### Zyco Fix

The acrylic composition ensures Excellent UV stability, high strength and elongation up to 250% on mixing with cement and sand.
