

Cancer Grass Roots Awareness Project

In the UK more people are being diagnosed with cancer...
but more are surviving, often thanks to early detection,
early intervention and early treatment.

Cancer screening for some of the more common and life-threatening cancers now exists –
but many still choose not to go to their screening appointments. Why is this?

As part of the North East London Grass Roots Cancer Awareness Project we are delivering on line information
and discussion sessions via zoom on Prostate Cancer to find out what the PSA test is all about and why there isn't
a national screening programme as there is for breast cancer.

We'll discuss common early signs and when and how to go for a test.

What the test involves and the benefits of early detection.

Men only session: Wednesday 27th November 2024 with Dave Pegg

Time: 6-6.30PM
