

DESIGN \$500+

Design services are treated as an add-on for clients booking any of our packages. Design services for us don't just start & end with a Pinterest page. We start with your vision & inspiration, and move through all facets & design elements of a wedding to help you create a cohesive, unique design plan. We also provide full concept imaging for your design plan so you can visualize everything we have chosen in your venue space before your big day! These are great to assist in quoting different elements & services from various necessary vendors like florists & rental companies! For Coordination & Wedding Management clients, we create a full design concept & provide resources for sourcing every necessary element to carry out that vision. For Planning clients, we take it a step further to help quote & secure different options for all needed items as well. Taking out much of the leg work that takes up the most time for our clients in the wedding planning & design processes.

Design services include:

- 1-2 hour initial meeting to gather your vision, inspiration, needs, & wants for design, decor, & rental items
- mood boards including paper suites, decor, florals, linens, attire, color palette, & rentals cohesive with your vision
- 1-2 hour revision meeting to hone our vision & make necessary changes to our mood boards
- full list of resources, websites, vendor contacts, etc. to source needed items
- complete concept art for our designs with images in your venue space(s) so you can see it come to life before wedding day

*Planning clients also get vendor & rental/ purchase item quoting for all design elements as well as any necessary rental showroom visits
