

CCS-TOUCHLESS

Traffic Film Remover

- * **Safe To Use**
- * **Non Flammable**
- * **Biodegradable**
- * **Free Rinsing**
- * **Phosphate Free**
- * **Economical**
- * **Brushless**
- * **Leaves Shiny Protective Coating**

CCS Touchless is formulated from the latest materials available to the chemical industry. They are cationic in nature and Biodegradable with NO solvents or caustic soda used. A new material added leaves a shiny film on the surface of the vehicle which gives Touchless very positive results. This new material helps the detergent wet faster, cut through traffic film and rinse quicker than other products on the market. The shiny film gives the surface an impermeable coat to resist acid rain fading. Each time you use the product the vehicle will clean easier as the dirt is now formed over the protective coating instead of on the surface of the vehicle.

A CCS ENVIRO-SAFE PRODUCT

Designed for Coin-op and Touchless Wash Systems

Apply from bottom up, then wash from bottom up. Finally rinse from top down. Can be diluted up to 80 to 1.
