ROSA and RIO - Preventing Theft and Trespassing

RAD makes portable security easy and affordable. At the core of the RAD ecosystem is an autonomous response – the series of programmed and machine-learned responses to events and actions within the device’s field of view. RAD devices can detect unwanted activities such as trespassing and loitering, which often lead to more costly criminal activities.

ROSA harnesses the immense power of RAD’s AI analytic library to deter and detect suspicious activity. These fully customizable autonomous responses can be an escalation of both audible and visual alerts, such as highly visible lighting and blaring alarms.

RIO can be deployed with its solar panels positioned for optimum 24/7 performance – anywhere. Connectivity with RIO’s ROSA device is even easier. Regardless of where RIO is deployed, the device automatically connects to RAD’s cloud-based servers via ‘enhanced cellular’ connectivity, meaning there’s zero IT resources required to install and activate.

FEATURES

- Battery Backup (2 hrs)
- 2TB HDD
- 2 PTZ Cameras
- 24/7 xxx
- Mobile Alerts
- Real Time Visibility
- 4G LTE Cellular
- Warranty included in Subscription
- 12 Month Cloud Recording
- 2-Way Audio Communication
- Customizable Ribbon Lights
- 100 mph Wind Resistance
- Human and Vehicle Detection
- Unlimited App User Licenses

Monthly Subscription Cost	Hourly	Monthly
ROSA 4.0 - fixed-mounted self-contained security device	\$1.12	\$820
ROSA P360 - dual ROSA units using swtiched power	\$2.85	\$2080
RIO 360 - dual ROSA units on solar powered trailer	\$2.93	\$2140
RIO 180 - single ROSA unit on solar powered trailer	\$2.36	\$1725

*Survey, shipping and installation not included
*Prices valid until September 2025
