

— SUMMER 2026 · PEAK BUG SEASON

What's *bugging* you this summer?

Snap a photo of any insect, spider, or pest and get an instant ID — plus a treatment plan, lifecycle, and disease-risk read. In seconds, right from your phone.

01

Instant species ID

One photo in, a name out — with a confidence score you can trust.

02

Treatment protocol

EPA-registered steps and IPM guidance to handle it the right way.

03

Lifecycle & habitat

See where it breeds and how to stop the next generation.

04

Disease-risk read

Flags mosquitoes, ticks & other vectors before they're a problem.

Every identification is reviewed against the work of a **Board Certified Entomologist** — and you can escalate to a real human expert whenever you want a second opinion.
