

extinction rebellion

**We are facing an unprecedented global climate emergency. The Government has failed to protect us.
We have to act now.**

- "We are all used to talking about these impacts coming in the lifetime of our children or grandchildren. Now we know that it's us" *UN's Intergovernmental Panel on Climate Change*
- Mass extinction is happening now. Most of the wild nature that was on Earth 50 years ago is already dead and gone. **Human extinction is a real and escalating risk.**
- "If we do not change course by 2020, we risk missing the point where we can avoid runaway climate change, with disastrous consequences for people and all the natural systems that sustain us." *UN Secretary General*
- We are heading towards disastrous temperature rises in our children's lifetimes, with widespread **food shortages and mass migration.**

WE CAN CHANGE THIS – BUT WE HAVE TO ACT NOW

There are solutions that are technologically and economically possible in a short space of time.

But we have to pressure the Government to take action. NOW.
