

# Extinction Rebellion Lincolnshire

## Flooding

Areas shown in blue on the map will be flooded in our lifetimes (if you are 40 years old or younger), if global temperatures continue to rise as expected.

Peterborough will be a seaside town.

## Air Pollution

Is already a threat to life in Lincolnshire. In February 2019, many areas of the county including Lincoln, Scunthorpe, Grimsby, Market Rasen and Louth, had the maximum levels of 9 or 10 on the Government's scale of air pollution.

## Farming and food shortages

UK fertile farming soil is predicted to run out within 60 years. Flooding will further hit crop production, meaning that there will be food shortages and higher prices for the food that is available.

**WE CAN CHANGE THIS IF WE ACT NOW** Lincolnshire has a proud history of rebellion. Read more about this history and what you can do today to protect our beautiful county on our website:
