

## Translation services for new clients and families

At Pacheco Autism Center we provide translation services in multiple languages such as English, Portuguese, Spanish & Haitian Creole. These translation services will be available for each family at their convenience.

Before giving our intake paperwork, we will give families a form to further provide us with the family and clients preferred languages for written and oral communication.

At Pacheco Autism Center we offer translation services onsite. The translators onsite speak English, Portuguese, Spanish & Haitian Creole and are available during the hours of 8am-5:30pm. Families can access our translation services by calling us at 508-974-4760 or by visiting our center at 529 Faunce Corner Rd. Dartmouth MA, 02747.

If our onsite translator does not speak the required language, then we will use MassHealth free translator services to better assist you.
