

**Water Management Advisors** is a consulting company that educates and advises facilities on how to manage their risk of Legionella and other waterborne pathogens. From creation to implementation, we assist facilities with their Legionella water management plans in compliance with CMS and ASHRAE standards. We provide tools necessary for managing Legionella risk and guidance on how to create, implement, and continually validate a water management plan.

## *Our Capabilities*

- **Water Management Plans**
- **Legionella Employee Training**
- **Point of Use Filtration**
- **Water Management Consulting**
- **Water Sampling and Lab Coordination**
- **Secondary Disinfection Education**

## *Our Proven Process*

## *Helping Compliance with GSA Testing*

Water Management Advisors is staffed with ASSE 12080 professionals to meet the testing requirements for GSA's new mandate for water quality testing. We can come on site to collect the appropriate samples and have them sent to a certified lab to test for Legionella, Total Coliform/E. coli, Copper, and Lead. We will then provide the needed report once test results are in.

## Typical Sampling Routine for GSA Drinking Water Quality Testing

### **Number of Samples:**

Representative amount (at least one sample per 3 outlets for Legionella and 10% of outlets for Total Coliform) based on building layout

*-minimum amount: at least 5 locations*

### **Type of Samples:**

Legionella- hot water, first draw

Total Coliform/*E. coli*- cold water

Copper- cold water, first draw

Lead- cold water, first draw

### **Day of Sampling:**

Scheduled on a day during the week, not following a weekend or holiday  
*(i.e., not after period of less than 8 hours, more than 18 hours stagnant)*

### **Report Submittal Includes:**

1. Executive Summary (quick preview of items included in the report)
2. Background Information (details about facility sampled, information on water quality parameters being sampled, etc.)
3. Investigation (pictures, sample locations, test results, limits by regulatory groups, etc.)
4. Conclusions
5. Signature of ASSE 12080 professional
6. Report Attachments (from certified laboratory)
