

Water Management Advisors is a consulting company that educates and advises facilities on how to manage their risk of Legionella and other waterborne pathogens. From creation to implementation, we assist facilities with their Legionella water management plans in compliance with certification standards. We provide tools necessary for managing Legionella risk and guidance on how to create, implement, and continually validate a water management plan.

Our Capabilities

- Legionella Water Management Plans
- Legionella Employee Training
- Personalized Support for Customers
- Legionella Consulting
- Legionella Sampling and Lab Coordination
- Secondary Disinfection Education

Our Proven Process

Service Area

Water Management Advisors' main headquarters is in Bowling Green, Ohio, and we serve facilities across the United States with providing reliable and defensible Legionella water management plans and advising.
