Take back control of your town's communications.
The Social Media Nightmare.

Does your town have or are you considering using social media to communicate with your residents?

It can be hard to control messaging on social media.

How many different social media accounts does your town need to post information to?

People can use your social media platform(s) to make complaints.

Do you want control of your town's communications?

Our system is different...

You get your very own app. You send information direct to people's phones who have downloaded your app.

You control what information is sent out.

You can have a report page for citizens to send the town information – that ONLY the town sees. It is NOT in a public forum setting.

Citizen's feel like they have a way to keep the town up to date on issues relevant to citizens, but it doesn't become a public forum for complaining.

You do NOT need to develop or maintain a database of cell phone numbers or email addresses like you have to with other alert systems.

Your citizens will enjoy being kept up to date on relevant local municipal information. You will enjoy the ease with which you get information out!
