

HARDSCAPES
2021 CATALOG

2021 NEW PRODUCTS

Driven by the challenge to find a better way, our mission is to serve the landscape industry by providing products that are better looking, easier to work with, and more durable than their alternatives.

IN 2021, WE INTRODUCE TO YOU...

GRAND LEDGE WALL

- Attractive and easy to install "Big Block" wetcast wall system
- Look of natural ledgestone
- Four sizes, plus corner blocks

MONTROSE SLABS

- Large format slab in 42"x42"x1"
- Utilizing our ultra high performance concrete technology (TEKTRAMAT®)

DIMENSIONAL 5' STEP

- The new 5' Step means we now have Dimensional Steps in 3', 4', 4'XL, 5' and 6' sizes
- New face and texture

NEW NATURAL STONE

- Offering additional marble and travertine products in a variety of textures and colors
- Matching coping and caps
- Additional size options

MATERIALS & TECHNOLOGIES

WETCAST

HIGH FORMAT® products are primarily made of concrete utilizing our wetcast production system. Wetcast concrete offers benefits including:

- Detailed, natural looking textures
- Seamless blending of colors throughout
- Long-term structural integrity

WETCAST WITH VIBRALOCK®

VIBRALOCK® is an integrated surface technology that is directly incorporated into the production process of many of our slab and paver products to deliver benefits including:

- A harder surface with greater resistance to abrasion
- More vibrant and enduring color
- Increased resistance to efflorescence

TEKTRAMAT®

TEKTRAMAT® is our proprietary material based around ultra high performance concrete technology (UHPC). Products made from this material offer benefits including:

- Efficient installation resulting from large yet thinly formatted shapes
- Ultra-realistic replication of fine detail
- Unsurpassed durability including salt proof surface

NATURAL STONE

HIGH FORMAT® offers several premium travertine and marble pavers, slabs and coping. Responsibly harvested from nature, this material offers benefits including:

- Antiqued, non-slip surface
- Gauged thickness with precise dimensions
- Vibrant and unique color patterns

LIFETIME LIMITED WARRANTY

We want you to feel comfortable and confident when starting your project. That's why we make sure you have the resources you need to get the job done right. Everything we make, we back with a lifetime limited warranty.

HIGH FORMAT® products as manufactured by HIGH FORMAT® are backed by a lifetime limited warranty from the manufacturer to the original end user, for products used in residential applications. This assurance of product quality is applicable where products have been correctly installed to manufacturer's specifications. Any properly installed hardscape material manufactured by HIGH FORMAT® that deteriorates due to the concrete in the product not meeting the design strength specification will be replaced by the manufacturer. The following items are not covered by this warranty: color variances and the appearance of surface stains resulting from chemical reactions such as efflorescence or differential curing; damage caused by installation, misuse or abuse of the materials; deterioration caused by de-icing salts or fertilizers; damage resulting from sub-grade settlement or movement, hairline cracks that do not affect the structural performance of the product, spalling of less than three percent of the surface area, contact with chemicals or paint, discoloration due to airborne contamination, staining, oxidation, or improper sealing. Products purchased must be registered with the manufacturer within 60 days of end user's purchase for warranty to be valid. You may register your project at HIGHFORMAT.COM/WARRANTY.

All warranty claims must be made prior to the removal or disposal of the defective product. Warranty claims will be reviewed by a company representative and may require samples of defective product for analysis. Warranty does not include removal, installation, or transportation to replace the material. Warranty is not transferable and is extended to the original end user only. Proof of purchase is required.

For additional questions please contact us at (877) 777-6558

NOTE: This warranty applies to Wetcast, TEKTRAMAT®, and VIBRALOCK® products only.

ADDITIONAL INFORMATION

COLOR:

We at HIGH FORMAT®, along with our media partners, do our best to produce print and digital materials that accurately reflect the true shades and tones of our product. However, we cannot guarantee perfect color matching for project photos, color swatches, or other picture representations. Final color selection should be made from actual material which can be viewed at your local dealer location.

Integral pigments are incorporated into the raw materials for all HIGH FORMAT® products to intentionally produce subtle shades and color variations throughout each block or paver. Therefore no product seen in a photograph will be precisely duplicated. For the most natural appearance, install products from multiple pallets simultaneously. This will create a blended, natural look.

EFFLORESCENCE:

Efflorescence is a naturally occurring, chalky, white residue commonly found on concrete surfaces. The presence of efflorescence in no way degrades the integrity of any product. It can usually be removed with efflorescence cleaners and often washes away over time. HIGH FORMAT® does not cover the presence of efflorescence under warranty.

PACKAGING:

Variation in color can occur where packaging comes into contact with the product. Often, these variations will fade with time. This does not affect the integrity of the material, and it is not considered to be a defect. Color variation caused by contact with packaging materials is not covered under warranty.

POLYMERIC HAZE:

Improper installation of ancillary polymeric sand products may result in the presence of polymeric haze. This discoloration can potentially mute the vibrant colors of concrete products. Hazing is not indicative of the quality of the HIGH FORMAT® product, and should not be considered a source of concern for the product's durability. Because HIGH FORMAT® cannot regulate selection or installation of aftermarket accessory materials, we do not warranty against the presence of polymeric haze. In general, polymeric haze can be cleaned and washes away over time.

HEAVY EQUIPMENT:

The broad surface dimensions of HIGH FORMAT®'s slab products are not engineered for vehicular traffic and compaction equipment. The exceptions to this exclusion are the more traditionally dimensioned New Mission and Amaro pavers. Both New Mission and Amaro can be used as driveway pavers and/or finish-compacted. If a compactor is used to aid in installation of New Mission or Amaro Pavers, then a urethane pad should be used with the compactor to protect the detailed surfaces of the pavers from damage.

NORMAL MAINTENANCE AND CARE:

As with any product that is continually exposed to the natural environment, cleaning and care may be desired over time to maintain the appearance of your hard scapes. Generous rinsing with water and light scrubbing with a stiff, plastic bristle brush is generally the best way to remove dirt that has accumulated over time. Cleaners and mild detergent designed to be used on concrete products may be used as well. Always follow all manufacturer instructions and test on a small area when using any cleaner. Power washers may cause damage at close range.

WINTER CARE:

All metal snow shovels and snow blower blades have the potential to damage concrete surfaces. All snowplows, snow blowers and shovels used to clear HIGH FORMAT® products of snow should use plastic blades or guards. De-icing salts will damage concrete and should not be used with HIGH FORMAT® products unless they are made with TEKTRAMAT® technology. HIGH FORMAT® does not cover damage done by snow removal, de-icing, or improper loading under warranty.

NATURAL STONE:

Natural stone is a product of nature. Surface texture and color will vary piece to piece and crate to crate. Our partnering quarries work hard to ship consistent, high quality product, but you should expect variation. Samples are suggested, but will not guarantee color. We highly recommend all material be delivered prior to installation and that available material is blended throughout your project. Each installation will be uniquely different and perfectly created in nature!
