

HOW TO INSTALL THE DOOR HOOKS.

QUICK DOOR PREP

First, open your car door and gently pull back the weatherstripping seal. This little move is your first step to a huge space upgrade for all your travel essentials!

HOOK IT UP

Now that the seal is out of the way, place a door hook on the metal doorframe. The hook provides a firm anchor point, keeping your cargo carrier stable during your travels

SEAL THE DEAL

Press that weatherstripping seal right back into place. Closing the door now locks everything in place, preventing gaps and loose ends for a smooth drive

REPEAT & READY

Repeat these steps for the other doors to anchor the rooftop cargo bag securely. Secure all corners, and voila! Your cargo bag is locked in, ready to hit the road!
