# Masks

## DISPOSABLE 3 PLY MASK

---

# DISPOSABLE 3 PLY MASK

## Mask Options:

- Level 1 (Non-Certified)
- Level 2 Medical Grade
- Level 3 Medical Grade
- Level 4 Medical Grade

# CIVILIAN GRADE RESPIRATOR MASK

# RESPIRATOR MASK INFORMATION

KN95 mask is composed of surface layer, filter layer, inner layer, nose clip and elastic cord, etc. The materials of the surface layer and the inner layer are Spunbond non-woven fabrics. The materials of the filter layer are meltblown non-woven fabrics and the material of the elastic cord is made of the braided polyester thread. The nose clip is made of the bendable and shapeable metal.

## **APPLICATION:**

It is applicable for filtering particles in the air and blocking droplets, blood, body fluids and secretions in the medical situation.

# CDC APPROVED RESPIRATOR

These are allowable for health care use.

# NIOSH N95 RESPIRATOR

---

## Remarks:

- Provides respiratory protection for the wearer
- Meets CDC guidelines for COVID-19 exposure control
- Helps reduce wearer exposure to certain airborne particles .03 microns and larger in size
- Fluid resistant to splash and spatter of blood and other infectious materials

# CLOTH FACE MASK

Fitted w/ Ear Loop

Oval w/ Ear Loop & Pocket

Oval w/ Ear Loop

## Fabric Face Masks

Protect yourself against large particles and respiratory droplets. These fabric face masks are comfortable and washable. The CDC recommends washing fabric masks after each use.

The CDC recommends wearing cloth face coverings in public settings where other social distancing measures are difficult to maintain (e.g., grocery stores and pharmacies), especially in areas of significant community-based transmission.

\*Data based on a study by Anna Davies *University of Cambridge* & Katy-Anne Thompson *Public Health England*. Source data available on request.

These are intended to be used in conjunction with medical grade masks, which are not included.

- 100% Cotton
- Washable
- Reusable
- Made in USA
- Logo branding available

- Dual layer 100% cotton
- 30/1 Jersey knit
- Antimicrobial coated
- 70% Effective against 1-micron particles\*

# FACE SHIELD

# FACE SHIELD

Protect yourself from droplet borne pathogens. Easy to secure and comfortable for all-day wear. Padded foam for total comfort. An air gap between the shield and headband encourages airflow, deters fogging, and keeps you cool.

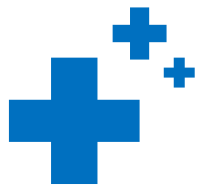

**ANSI Z87 .1 8.1.2 face shield droplet and splash hazard compliant.**

- Thick PET Plastic
- Soft foam padding
- Adjustable
- 12.5" x 10.25" Size
- One size fits all
- Excellent clarity
- Easy to clean and sanitize
- Custom branding available

# Protective Apparel

# ISOLATION GOWN

25 per case

Individually sealed

Gowns are 36" wide at the shoulders, and 49" long

Optional  
Thumb Holes

Front break-away  
capability perforated  
for easy removal

Meets the:

- American Society for Testing Materials (ASTM) F2407-06 — the standard that is recognized by the FDA
- American Association of Textile Chemists and Colorists Liquid Penetration Test 42

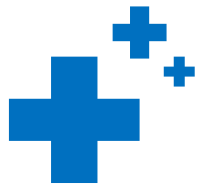

Arms: 20" long  
and 10.5" wide

Custom colors available

7-10 business days for +20,000  
gown orders. Immediate  
availability on small quantities.

Made in the USA.  
Manufactured in Summit,  
Mississippi FDA Registered.

## Other PPE Products

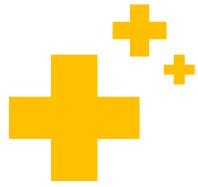

# DISPOSABLE NITRILE GLOVES

- Material: Nitrile
- Color: Blue, White, Black (depends on stock)
- Quantity: 100 gloves per box
- Sizes: S-XL

## Remarks:

- Non-Sterile
- Ambidextrous
- Beaded Cuff
- Finger Textured
- Powder-free

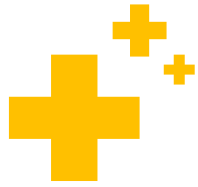

# DISPOSABLE LATEX GLOVES

---

- Material: Latex
- Quantity: 100 gloves per box
- Glove Options:
  - FDA Approved
  - Industrial
- Sizes: S-XL
- Remarks:
  - Non-Sterile
  - Ambidextrous
  - Beaded Cuff
  - Finger Textured

\*Packaging and brand may vary.

# SAFETY GOGGLES

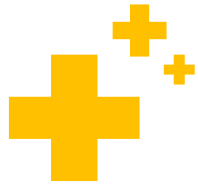

---

## Remarks:

- Anti-Splash, anti-impact, high light, anti-fog
- Large space inside, can wear myopia glasses
- Use for medial protective, hospital, school, epidemic prevention duty

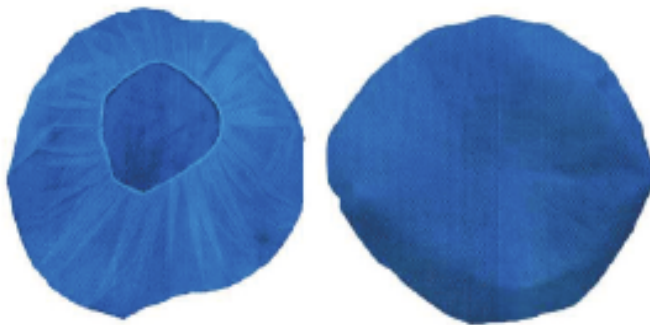

## BOUFFANT CAP

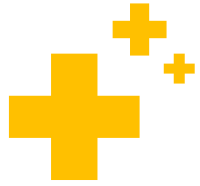

---

### Remarks:

- Non-Sterile
- Disposable
- Lightweight, soft and breathable
- Effective protection against liquid splashing

## 1.5ML 70% ALCOHOL SANITIZER

ANTIBACTERIAL

DERMATOLOGICALLY TESTED

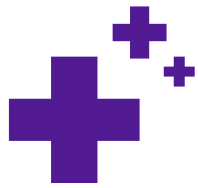

DISINFECTION

Kills most types of germs, bacteria, viruses. The transmission of some flu-like diseases can be prevented by using a hand sanitizers. Alcohol-based hand sanitizer definitely fights against germs and kills 99.9% germs.

DISINFECTION

# PPE SAFETY KITS

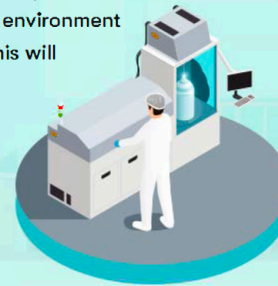

## UV LIGHT DISINFECTANT

Our process begins with processing our safety kit components through a method that uses short-wavelength ultraviolet light to kill microorganisms by destroying nucleic acids and disrupting their DNA, leaving them unable to perform vital cellular functions.

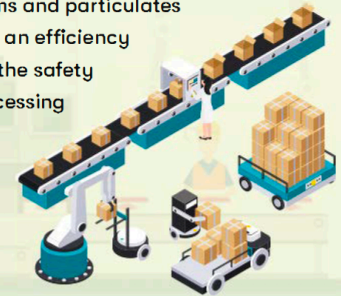

## NITROGEN PURGING

Each Safety Kit is purged with nitrogen to ensure our products stay dry and sterile. We package each kit with a Nitrogen drip before it is sealed creating an environment made of high purity N2 gas, this will help preserve and protect the product during transport.

## PACKAGING

We package each safety kit in an ISO 5/Class 100 horizontal laminar flow hood that removes organisms and particulates 0.3 micron in size with an efficiency of 99.99%. We ensure the safety of our product by processing our kits in a ISO clean environment.

## COMPONENTS

All of our components that are included in our Safety kit on the go have passed FDA inspections and are FDA and USDA compliant. All components included in our safety kit are manufactured in a cGMP facility and FDA registered facility to ensure quality.

## OUR TEAM

To ensure the safety of our customers our entire kitting team is equipped with head to toe PPE gear for your protection. Each team member follows social distancing in a manufacturing environment, and is temperature checked daily.
