### Real-World Training

This is the training your company needs, and your employees want.

### One-day hands-on training with job tasks, tailored to your company's specific needs

- Hands-on labs for employees to comply with demonstrated ability and annual auditing requirements
- Employees will be using Job Safety Analysis (JSA) procedures
- JSA's are a part of paperwork completed documenting employees have safely and correctly completed the labs

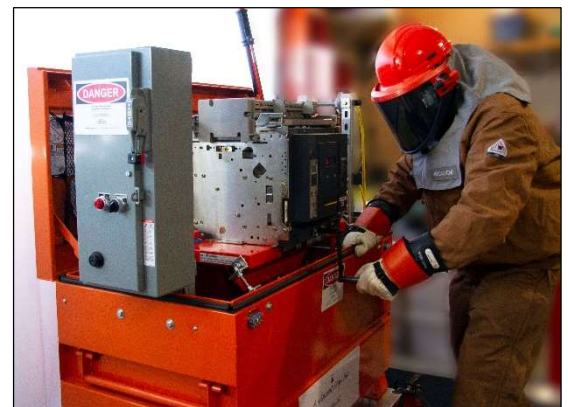

### OBJECTIVES

- Inspect, use and maintain electrical PPE
- Perform correct grounding for personal protection
- Verify electrical equipment is in an electrically safe work condition
- Property select PPE and safely troubleshoot control and power equipment
- Check for winding faults and failures in motor simulators.
- Selection of PPE based on 70E tables, equipment labels, or when no labels are available

### HANDS-ON LABS

- Select and inspect PPE, Tools, and Test Equipment
- Check Cords, GFCI's, Assured Equip. Grounding Checks
- Verify an Electrically Safe Work Condition/LOTO
- Control Panel with 3-Phase Motor and VeriSafe LOTO
- Generator Panel and Transfer Switch
- Variable Frequency Drive and PLC Control
- Rackable Breaker from Switchgear
- Personal Protective Grounds
- Motor Windings Checks – Short, Grounds, Open

*"Our team always looks forward to a Vince May class, and the Hands-On class was no different. The training stations were well thought out with multiple opportunities for Teammates to demonstrate the competency required to do each task. At the end of each session, participants had detailed documentation showing what tasks they had done that day, signed off and ready to go. All in all, it was a great way to help ensure your team is working safely!"*

*Chris Widdicombe, Nucor Steel*
