

COLLEGE OF
HOLISTIC HEALING

VISION
MISSION

HEALERS ENERGIZING THEIR SUPERPOWERS

VISION

Our vision is to activate and elevate healers collaboratively to transform millions of people worldwide to live fully-expressed love-filled lives.

We co-create a new humanity for those we touch.

MISSION

The path for students, alumni and faculty of the College of Holistic Healing (CHH) is to discover their contribution to the world's healing through their own sovereignty, love and community.

CHH fosters education, integration and the embodiment of both the physical world as well as the metaphysical realms.

Within higher education models, CHH schools are recognized and accredited to promote further holistic healing for body, emotions, mind, relationships and spirit.

We, CHH faculty, staff, students, and affiliates follow our heart and soul's calling to express our healing gifts and to share them with the world. We stay out of status quo ways of being and nurture our individual creativity and peak potential.

We focus on the education, research and practice of holistic healing, self-healing, and healing our planet, society, and bio-energetics. By joining together with individuals of shared values, we find strength in a doctrine-free thriving community.

VALUES

Holistic Healing and Learning Methodologies

We are a multi-disciplinary college with Schools of Professional & Clinical Hypnotherapy, Energy Psychology, Transformational Coaching, and Business as a Healer. We expect to expand to include other disciplines in the near future.

Love

We acknowledge that our hearts are able to dream our future into being creating a thriving loving humanity. We imagine a healthy world that fosters expansive and love-filled lives.

Generosity of Spirit

We foster collaboration in all aspects of our teaching practices. There is a strong cross-pollination of disciplines that supports our holistic values. We generously share our knowledge and talents with each other.

Honour & Respect

We know in order to create this thriving loving humanity the tenants of honour and respect for one another are paramount. As it relates to CHH we operate with the principle that each school contributes to the students' journey without hierarchy.

Inclusiveness

Practices and policies are designed to include diversity management and equity terminology to guide the actual embodiment of acceptance and inclusion at all levels of CHH.

Contribution

All people involved in CHH are service-oriented and motivated by contributing to others. Service projects naturally arise and are enthusiastically implemented as a result of this value.

Doctrine-Free

We honour and respect individual belief systems that uplift and expand humanity.
