Ms. Patricia Hannon
State of New Hampshire
Waste Management Division
6 Hazen Drive
Concord, New Hampshire 03301

Dear Pat:

Casella Waste Management, Inc. of Rutland, Vermont, apparently will shortly be operating a municipal solid waste landfill in New Hampshire. As we discussed, I have been asked by CWM, Inc. to outline the experience and qualifications of Douglas Casella in landfill management within the State of Vermont.

Subsidiaries of CWM, Inc. own and operate two Vermont Landfills, Newbury Waste Management, Inc., and Bristol Waste Management, Inc., located in Newbury and Bristol, respectively.

Newbury Waste Management, Inc. was purchased by Casella in September, 1988. The unlined landfill was operated until January, 1993, when closure under statute was required. While operating, the landfill served about 20 New Hampshire and Vermont towns. Capping will commence in the spring. NWM, Inc. has applied for certification of a lined landfill designed for an adjacent area of the site.

Bristol Waste Management, Inc. is a currently operating, unlined landfill purchased by Casella in 1990. Closure of the facility is scheduled for October, 1993. The facility is relatively large by Vermont standards, accepting waste from two counties. There are no plans for expansion.

Casella Waste Management, Inc. has constructed and operates several regional materials processing facilities in Vermont.

Casella Waste Management, Inc. has designed, constructed and operates numerous transfer stations in Vermont.

Douglas Casella oversees the physical development and operation of both landfill facilities. Mr. Casella was also instrumental in the design and construction of the recycling and transfer facilities. Mr. Casella is knowledgeable in all types of earthwork and heavy construction, landfill development, operating techniques, and closure. He is familiar with Vermont's regulations and guidelines for operation of landfills and transfer stations and the Division's solid waste management facility inspection procedures.
