To:Conservation Chair <conservationchair@townofdaltonnh.gov>

Thank you for your comments.

We note your request for a 30-day extension to the public comment period in light of the upcoming May 8, 2024 joint outreach event with USACE, EPA, and NHDES. This is an event where state and federal agencies will provide general information about NHDES and USACE permit evaluation processes. This event is independent of the project NAE-2021-02240 and will not provide the public with additional information needed to evaluate the impacts of the proposed Granite State Landfill project on the public interest. Because the outreach event is unrelated to File No. NAE-2021-02240, it does not warrant extending the public comment period for this permit application.

Unfortunately we cannot access the Dropbox link you sent so we will send you an FTP site where you can upload materials for our review. This is a one time use FTP site and will come in a separate email. If at any time you need this link to send us information please feel free to reach out to us to obtain a link.
