City management approved the requested three week duration. Considering the sensitivity of this practice, lets please keep it at the three weeks.....

Thank you,

Good Afternoon, Chris,

I requested three weeks, but we'd take any additional term that the City is comfortable offering. We will likely transition the delivering pre-treated leachate from our facility in Vermont in the future, but NCES does not have the ability to pretreat at this time.

Clark

Hello Clark,

I hope things are well with you,

I am presently drafting the Class III permit for you and would like to confirm the duration of the permit cycle.

I should have it completed and have you execute it on Monday 4/29/24.

If you have any questions, please feel free to reach out.

Sincerely,
Chris

Clark,

Casella has been approved to dispose of leachate at the Manchester WWTP in accordance with your April 17th request below. Chris will prepare a temporary permit for Casella. We look forward to continuing our mutually beneficial business relationship with our colleagues at Casella.....

Thank you,

Subject: [External Email] Leachate Disposal

Good Morning, Fred,

Casella's NCES landfill located in Bethlehem continues to struggle with excess leachate and insufficient treatment capacity. I was planning to discuss this topic with your team in the next few weeks as part of an agenda when we discuss renewing and extending our back-up disposal agreement. However, NCES is in dire need of disposal capacity right now. Is there any chance that the City could issue another temporary permit to accept three loads/day for a three-week period? At that point, Casella could reapply for disposal of leachate generated by NEWSVT, which will have undergone treatment to remove PFAS, which was our original plan. Unfortunately, the combination of wet weather, the landfill construction sequence and a shortfall of capacity at Concord WWTP necessitate more immediate measures.

I recognize this is a sticky topic with the City given the scrutiny of WWTP operations, but hope that we can work together to help bridge the immediate shortfall in capacity until we have time to discuss and develop a longer-term plan that addresses the City's concerns about treating emerging contaminants.

Please let me know at your earliest convenience.

Best Regards,

Clark James
