

COMMENTS - (Use another sheet if necessary)

On May 21, 2024, I met with Kevin Roy, the Division Manager of North County Environmental Services, Inc., to conduct an inspection. North County Environmental Services is a landfill that handles non-hazardous solid waste material. They reached out to PVSC to inquire if we could accept their leachate for a short-term discharge of 100,000 gallons per week. I retrieved the leachate from the leachate storage and loading area, where there were 2 – 30,000 gallon tanks that consolidate into a 150,000-gallon above-ground storage tank to be sampled.
