Hi Adam,

I am aware of the discussion. The form on our website is provided as a courtesy and not required to be used. The information listed in Env-Wq 1509.07 must be submitted with the request. Env-Wq 1509.07(c) requires that the applicant

or agent sign a form or letter with the submitted information. If you don't want to use the form, include all the information required in Env-Wq 1509.07 on your own form or letter and have the applicant or agent sign it.

A pdf of the document can be emailed to me.

Thanks,

Mike Schlosser, PE

Hi Mike,

I understand that counsel for the applicant has discussed the extension request below and your request for an additional form submission with Josh Harrison with the Attorney General's Office. Mr. Harrison has indicated that that an email request is sufficient to request an extension, and that a form is not required. Please let me know if you have any additional questions concerning this extension request.

Adam

Hi Adam,

We recently added a *Request to Extend Response Deadline* form to the AoT webpage that can be found here: <https://onlineforms.nh.gov/Home/55956b88-c5c4-48cb-9d02-a4fd5c7011a3>.

Please complete the form and email me a pdf.

Thank you,

Hi Mike,

Pursuant to 485-A:17, II-b(a), Granite State Landfill, LLC (GSL) is requesting an extension for 90 additional days to respond to the request for more information (RFMI) from the AoT program dated June 24, 2024. This request will extend the response deadline to September 19, 2025. GSL is requesting this extension due to the unsettled nature of the relevant statutory and regulatory framework. We would prefer to have this resolved before updating our responses.

A similar request will be made to NHDES-wetlands to extend that response deadline as well. Thanks for your continued coordination with GSL and please feel free to reach out to us with any questions on this request.

Adam

Subject: RE: Request for More Information: Granite State Landfill, Dalton & Bethlehem, AoT Application 231113-224

Hi Mike,

Pursuant to 485-A:17, II-b(a), Granite State Landfill, LLC (GSL) is requesting an extension for 90 additional days to respond to the request for more information (RFMI) from the AoT program dated June 24, 2024. This request will extend the response deadline to June 21, 2025. There are three principal reasons we are seeking this extension. The first is that the adoption of the new Env-Sw 800 rules has required us to reevaluate all of GSL's pending applications for consistency with the requirements of the new rules. The second is that GSL has had to engage in discussions with and educate the owner of the parcels outside of the two landfill parcels about why DES is requiring GSL to access his parcels. These discussions were successful, and GSL has been able to complete the sitework required by AoT's RFMI, but GSL is still aggregating the data and preparing the responses to the RFMI. The third is that the RFMI has resulted in design adjustments to proposed stormwater infrastructure, and that design work is not yet completed.

A similar request will be made to NHDES-wetlands to extend that response deadline as well.

Thanks for your continued coordination with GSL and please feel free to reach out to us with any questions on this request.

Adam

Subject: RE: Request for More Information: Granite State Landfill, Dalton & Bethlehem, AoT Application 231113-224

Hi Mike,

As discussed, Granite State Landfill, LLC (GSL) is requesting a second extension for 60 additional days to respond to the request for more information (RFMI) dated June 24, 2024. This request will extend the response deadline to March 23, 2025 and is made to provide additional time to respond to the items in the letter, some of which require design adjustments to proposed stormwater infrastructure. Field work required to respond to the RFMI is ongoing and taking longer than anticipated, including infiltration testing and seasonal high-water table delineation. This field work is expected to be completed in mid-January.

Field work related to the wetlands permit is also being completed concurrently and a similar request will be made to NHDES-wetlands to extend that response deadline as well. The wetlands permit extension request will also be for an additional 60 days so that those response deadlines continue to be synched which we understand is preferred by NHDES.

Thanks for your continued coordination with GSL and please feel free to reach out to us with any questions on this request. Adam

Hi Mike,

As discussed, Granite State Landfill, LLC (GSL) is requesting a three-month extension to respond to the request for more information (RFMI) dated June 24, 2024, which would extend the response deadline to January 22, 2024. This request is made to provide additional time to respond to the items in the letter, some of which require design adjustments to proposed stormwater infrastructure. Field work required to respond to the RFMI is also ongoing, including infiltration testing and seasonal high-water table delineation, and is expected to be completed later this month or early November. Field work related to the wetlands permit is also being completed concurrently and a similar request will be made to NHDES-wetlands to extend that response deadline as well. The wetlands permit extension request will also be for an additional three months so that those response deadlines continue to be synched which we understand is preferred by NHDES.

Thanks for your continued coordination with GSL and please feel free to reach out to us with any questions on this request. Adam

Hi Adam,

I have completed my review of your Alteration of Terrain permit application. Attached please find a copy of my review letter in Word form for you to use with your resubmittal as well as a signed copy as a pdf. The applicant, municipalities, and local river advisory committee are receiving their copies of this letter via this transmittal. Paper copies are not being mailed.

Please note that your resubmittal is due on [October 22, 2024](#).

Please contact me if you have any questions.

Thank you,

Mike Schlosser, PE
