Working Group Responsibilities

The solid waste working group's responsibilities include the following:

1. Assist NHDES in long-range planning for and the development of solutions to the state's solid waste management challenges.
2. Review and make recommendations for changes to the state's existing solid waste reduction, recycling, and management policies, programs, goals, and initiatives.
3. Review and make recommendations regarding the impact of regional solid waste management initiatives, including landfill waste disposal bans, on New Hampshire's solid waste disposal landfill capacity.
4. Advise NHDES in the development of the solid waste management plan.
5. Review and recommend methods to better provide technical assistance and educational outreach to municipalities, schools, businesses, and the public regarding solid waste reduction, recycling, and management policies.
6. Review and recommend ways to better implement the solid waste hierarchy and solid waste reduction goals.
7. Review and make recommendations based on the [HB 617 study committee report](#) on recycling and solid waste management in New Hampshire.
8. Review such other matters as the working group deems necessary and to recommend any related legislation, policy, or rule changes.

The working group will submit an initial report on November 30, 2022 and a final report on November 1, 2026.
