CAPABILITIES STATEMENT

WESCOM SOLUTIONS

Who We Are

Wescom Solutions provides rail transit systems engineering, construction management, and operations support services with a specialized focus on Overhead Contact Systems (OCS). Our mission is to help clients strengthen system capabilities, improve capital program execution, and enhance operational efficiency in the safest, most time- and cost-effective way.

What Sets Us Apart

What sets our firm apart is our adaptability, efficiency, and unwavering "get-it-done" attitude. We stay focused on what matters most, prioritize our clients at every step, and use our agile structure to provide outstanding service and results.

What We Do

Systems Engineering
(with a focus on OCS)

- Planning & Design
- Design Review
- Design Services During Construction (DSDC)
