Part 1 : October 2022-May 2023

As for this period, number of participations published for Egyptian physicians/scientists, were approximate of 10000 contributions.

-Country of publication in this period, as following:

Table no. 1 (Country of publication)

Country	Number of essays, notes, reviews, etc. published
England	2325
Switzerland	1784
United States	1560
Netherlands	801
Germany	667
France	122
India	93
New Zealand	84
Italy	81
United Arab Emirates	62
Egypt	60
Saudi Arabia	58
Korea (South)	53
Ireland	50
Japan	40
Canada	34
Poland	33
Brazil	32
Australia	30

Thailand				26
Iran				25
Spain				25
Denmark				23
Scotland				22
Austria				20
Turkey				20
China				15
Treasure Island (FL)				10
Romania				6
Singapore				5
Bangladesh				4
Greece				4
Pakistan				4
China (Republic : 1949-)				2
Libya				2
Malaysia				2
Mexico				2
Norway				2
Oman				2
Qatar				2
Belgium				1
Bulgaria				1
Czech Republic				1
Ethiopia				1
Georgia (Republic)				1
Serbia				1
Slovakia				1
Slovenia				1
South Africa				1
Sweden				1
Uganda				1

From the previous table we can see:

* England as the **most** frequent country, of journals, books, etc., that published the Egyptian's contributions.

* Uganda as the **less** frequent country, of journals, books, etc., that published the Egyptian's contributions.

* **51** countries published the Egyptian's contributions.

-Language of publications in this period, as following:

* The English language was the only language used, to publish all contributions in this period.

Zoonoses Public Health					1

From the previous table we can see:

* Scientific reports was the **most** frequent journal title, that published the Egyptian's contributions.

* Zoonoses Public Health was the **less** frequent journal titles, and other titles, that published the Egyptian's contributions.

* About 1700 titles, published the Egyptian's contributions.

"Scientific reports" journal brief bibliographic data:

Scientific reports

Publication start year: 2011-

Country: England

Publication date: London : Nature Publishing Group, copyright 2011-

Peer-reviewed journal

From the previous table we can see:

* Covid 19, was the most frequent subject pattern, that Egyptian's contributions were into.

* Oxidative stress, was the second ranked frequent subject.

* Sirtuin 1 and many other subjects, were ranked and frequented **in 1 essay or research paper, etc.**

Conclusions:

-The international phenomena of Egyptian physician's contribution, into journals from different countries (about 50 countries), and about 1700 journal titles, is widely noticed.

-The cooperation with different authors and researchers, from so many countries, affiliations, and from East to West, is considered as a behavior of contribution in research, between Egyptian physicians and other researchers at these countries.

-The subjects, Egyptian researchers participated in and went into scientific experiences, differ, and going through, wide varieties and alternatives in these subjects.

- The subject, Egyptian researchers participated in, mostly, was Covid 19. As this period, is the pandemic time for the global humanity.
