- Line Item Descriptions for Hourly Rate, a la carte pricing -

- 1) Weekday rates apply Monday-Thursday, excluding holidays; session scheduling from 10am-7pm as available.
- 2) Weekend rates apply Friday, Saturday, & Sunday, excluding holidays; session scheduling intermittently between 10am-7pm as available
- 3) For each group with more than 5 individuals, begin additional per person fee with individual #6.
- 4) Once group size reaches 10, please contact our studio so we can help determine if an hourly, per person rate is truly the best approach to meeting your group's needs. We will discuss additional options available, plan accordingly, and provide you with a quote for your specific group.
- 5) For sessions focused on pre-teens and children under the age of 12, it is important to determine whether an hourly session is the most appropriate option to keep them engaged, bring out their best, and keep them interested in photo sessions for years to come. By contacting us and telling us about your child/pre-teen, your session goals, and preferred location(s), we can better assess what session options may be most advantageous and appropriate for your child/pre-teen.
- 6) Rather than stipulating how many outfits or wardrobe changes clients are permitted to have, we leave that up to you. Clients have approximately 1 hr once we begin the actual photo shoot, and can best determine for themselves how long it takes to change/adjust and what is a reasonable amount of changes. That being said, please be mindful, everything the day of an actual photo session will likely take a little longer than anticipated, and session time is not extended to meet all wardrobe changes unless the client(s) opt to add time to the session. We recommend including selected wardrobe and outfit changes as part of the initial design consultation, or as part of a follow-up call before each session. This ensures we have a mutual understanding heading into the session and can work together to manage time and number of images per outfit appropriately.
- 7) In-studio sessions will be held at our Chatham location. Backdrops and set-ups will be discussed during your initial design consultation so everything can be arranged prior to your arrival on the day of your session in order to best utilize the session time. Backdrops may include actual painted walls (with or without windows), fabric or paper backdrops, or a combination thereof with additional materials and lighting. We also have a variety of flooring and furniture options available to best match your vision and the size of your group. We will create a set-up using our expert experience to develop an atmosphere that will capture you/your group beautifully.
- 8) On-location sessions can be held in public venues where photography is permitted, on public properties outdoors, or on private properties with appropriate permissions. We will move through various settings at any one location during your session as long as time permits. Travel is included to locations within

20.0 miles of our studio address (per Maquest). Any locations beyond 20.01 miles will have travel fees applied. Please contact our studio for this additional information as it can vary with gas prices.

- 9) There is a one-hour minimum session fee, but additional time can be booked in half-hour increments.
- 10) Web-size digital downloads may be purchased individually or in bulk for additional financial savings. Once the image is downloaded to a device, it is just like any other file and can be shared as many times as desired.
- 11) For those who are interested, we offer the opportunity to participate in promoting our studio and creative work through our website, socials, and/or tangible prints on-location. In appreciation for doing so, we offer a set number of complimentary web-size digital downloads, pre-selected by our studio photographer with your session.
- 12) High-resolution digital downloads may be purchased individually or in bulk for additional financial savings. High resolution is our recommendation for larger prints, canvases, or other custom items. These are larger file sizes that contain more data, meaning the image maintains its' clarity even at larger print sizes.
- 13) Canvas prints add the look of art to your home or office. Premium canvas material is wrapped around a 1.5" deep frame, giving dimension to your image and separating it from wall spaces as well. Additional sizes available.
- 14) Please see our "Add-on Product" list for additional purchase options. Want something you don't see listed? Just ask, we have a variety of vendor products and are willing to work with additional vendors to obtain the products you would like to purchase.
- 15) Custom photo books are available in a variety of sizes and finishes, with the number of pages also varying. As such, each book is priced individually.
- 16) Session times are available for scheduling through 7pm many weekdays (session would end shortly after 8pm), and weekend times are available as well.
- 17) For those with a unique circumstance (family visiting from out-of-town, limited childcare options, non-traditional work schedule, etc.) who may need to schedule during a time outside of our normally listed hours, or request sessions during a normal holiday closure, we may be able to accommodate extended session hours. There is an increased session fee for extended hours, which would be discussed prior to booking.
- 18) For anyone interested in booking one of our hourly sessions, we provide a complimentary photo session design consultation. During this call, we will discuss all the people, places, and things that go into a client's ideal photo session, as well as session preparation, recommendations, and next steps. There is no charge for this and no obligation to book.
- 19) For each session that is booked, we include a Booking contract outlining all of the important details and agreements so no one has to wonder what is/is not included, or worry about any unexpected fees.
- 20) Prior to scheduled sessions, clients will be emailed a "how to prepare for your session" guide. The guide provides recommendations and tips to make sure each session brings out the best in our clients and runs smoothly.
- 21) Prior to booked sessions, clients will also be emailed a "what to bring" guide. This provides ideas for personal items, potential props, other commemorative pieces that may represent the client or something/someone important in their life.
- 22) Professional image enhancements are included at no additional cost. These are professional edits that enhance and refine what is naturally present. This may involve correcting any challenges created in the atmosphere at the time of the photo session, adding dimension or softening image components, or other edits to help images reflect the professional quality and premium services clients should expect

from us and their investment. These are not Ai generated quick fixes, rather individually edited aspects within the original image file. Professional image enhancements may also include minor client touch-ups such as acne/blemish removal, skin softening, teeth whitening (a few shades brighter than your natural color, not a fake bright white change), and removal/minimization of any eye glass glare.

- 23) Custom edits that are specific requests from the client(s) to change components of the image from how they naturally appeared during the session *may* result in added costs. These are typically more time-consuming edits that may have to be repeated individually for each purchased image. A few real-life examples of these edits may include: removing/minimizing tan lines, altering the color of something in the image, removing stains or spills from clothing, making a dirty pair of tennis shoes appear cleaner, removing shaded lenses from transitions eyewear, fixing chipped nail polish or filling it in.
- 24) Print order consultation, prior to your session, is also offered complimentary. This service provides us with an opportunity to assist you in determining what your printed photo needs and wants may be prior to your session occurring. This helps ensure we capture the prints you are wanting to update in the correct orientation (portrait or landscape), as well as assisting you in organizing your wish list (sizes) beforehand.
- 25) In-person or Zoom/Teams photo review and order processing is just one of the features that helps to set our studio apart. During our in-person ordering sessions, we will review images together, allowing clients to look at different crop/size settings and how these impact the image(s), discuss how subtle changes to color, saturation, and lighting may impact the image, review products available, and make sure clients are not only satisfied with the images, but also that they get the most out of their investment.
- 26) Once images have been reviewed in-person, online galleries containing watermarked images will be created and available for further image review. After purchase, watermarks will be removed and images may be used/shared.
- 27) All printed images are processed through a professional imaging lab and will either be delivered to the studio for pick-up, hand-delivered to homes/businesses within the immediate area, or may be directly shipped to your home/business address for your convenience (additional shipping fees may apply).
- 28) We are pleased to offer several convenient payment options. For the initial retainer fee, we accept Venmo, credit card (online or via phone), or a check (in an envelope) can be dropped off in the studio mailbox. The remaining session fee, due before the photo session, can be paid via cash, check, Venmo, or credit card with no added processing fees to the client. These same methods of payment are accepted for additional product purchases.
- 29) Have you ever left a session wondering what your photos are going to look like? For our in-studio sessions, clients can view photos on a full screen monitor and make adjustments to their positioning, clothing, hair, etc. during the session so they do not experience the, "I wish I would have..." moment when the photo images become available. By incorporating image review during the session, we can make adjustments in the moment and clients can leave with confidence in their images and knowing their investment is worthwhile.
- 30) During our initial complimentary design consultation, we will discuss the type of images you have in mind, and then construct components from our vast assortment of backdrops, flooring, furniture, and accessories to create an environment that meets or exceeds your expectations.
