PROFESSIONAL HEADSHOTS

For Personal Use Only

For commercial use by businesses, please see our Business/Professional Session Options

Professional Headshots provide your colleagues, contractors, and potential employers with their first visual impression of “Who you will be working with.” Your eye contact, facial gesture, and body language all work together not only with your attire, but also with the lighting in the studio to set a tone for this presentation. Will you choose something light and bright, soft and glowy, clear and true to the environment, or dramatic with shadows to relay the seriousness and intensity of your work? All of this will be discussed before you arrive in-studio so that we match your image to the message you want to send.

- **Purchase options:**

- \$100 per pose with minimal edits*, includes high resolution digital download
- \$250 for 3 images of the same person, same backdrop, with minimal edits*, includes high resolution digital downloads

Prices are based on all images being taken on the same day in-studio with one standard backdrop unless otherwise stated. Multiple poses will be taken regardless of image type selected below. After reviewing with the photographer and getting feedback on images, the client will select the final pose(s) for purchase.
