

Part 3

**PLEASE
STOP
DEATHS
SHOCKS
& FIRES**

Written by Clem Capdevila

Conclusion

Electricity is a silent killer. With many risks and actions that need to be taken to stay electrically safe.

The author has worked hard to present to the community the best solution to make electrical safety a reality.

The solution is to make it as easy as possible for the property owner and provide vital information for the electrician conducting the works required to ensure your electrical safety.

Solution for property owners

The author has created a range of solutions to help the property owner stay electrically safe.

They include:

1. Electrical safety services

**2. Stop the electric
silent killer website**

3. Plug-in System

4. Power loss help line

5. D.I.Y check kits

**6. eBooks for
14+ readers**

**7. eBooks & game
for 5+ readers**

Electrical safety services

**For customers in our catchment areas,
we offer the following services:**

Capdevila**

**Dedicated in
stopping the silent
killer worldwide.**

The Author is an electrical contractor in Australia. In 2015, after the notification of a death of the 5-year-old boy, and an electric shock received by a customer that conventional testing, was unable to prevent. The author has dedicated the past 7 years in developing ways to stop and to understand why deaths and shocks are happening worldwide.

The author

continued

The author in the fight to make the changes required to protect the community has:

2018 Complimentary Door knocking Danger Inspections for Inala, Qld.

2019 Written a Queensland Electrical Danger Report to 91 politicians in Queensland.

Presented new testing methods & Manufactured a safe electrical cable.

Meeting with the Queensland Electrical Safety Commissioner to discuss the 2019 report.

The author

continued

2020 Published 5 full page, 1 double page and 4 half page community information advertisement in a large geographical distribution newspaper.

2021 Designed safe electrical checking kits for the community.

Meetings with Queensland Government Electrical Safety Executive Director, ESO Legal Director, ESO Field Director and ESO Investigations Director.

Submitted a 34 page recommendation for the new Queensland Electrical Safety Act.

The author

continued

2022 Created the Electric Silent Killer Book Series, Electricity with Marley & Friend Book Series and Games.

All while running a company and a father of four children and eight stepchildren, and one grandson.

Final word

Electricity kills people every year and as a community we have no idea.

I believe it is because it has no story. Aids killed less than 1 million people a year in the 80's but it had a story. Governments heard the story and the newspapers and TV stations always had a new story of a new person or family slowly dying.

Electricity kills instantly and with no pre warning. Shocks are rarely reported and the story is always the same - not news rating worthy to write about for a long period.

But it is a real story, the untold story. That's why I believe there is no preventative solution worldwide.

That is why I am committed in creating a new path and leaving a trail to Stop the Silent Killer worldwide.
