

Why do House Fires and Electric Shocks keep happening?

Queensland Electrical Safety Act 2002:

1. Prevention of electric shock to people
2. Prevention of property fire from electricity

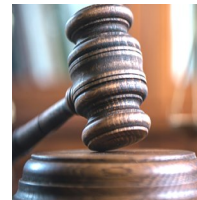

Result: Our Homes

1. Are left with hidden dangers after an electrician leaves
2. Our Homes are not tested, leaving us at risk of shock and fire

HOW CAN WE CHANGE THIS

Together we can change the law:

1. Electricians test entire home
2. Compulsary testing of our homes

If it becomes mandatory for all of us:
So will the school our children go to,
our workplace, the coffee shop we visit
and so on.....
