HOW IT WORKS Package your machine VERY securely and send it to our warehouse at 1648 W 134th Street, Gardena CA 90249. Include a note with your name, contact info, and the issue you are having. Once we receive the machine, our tech will provide the office staff with a repair write-up, including all the parts needed for repair. Our office staff will use that to generate a quote and give you a call!

TURNAROUND TIME Our typical turnaround time is 24-48 hours, provided all parts are in stock. This does not include time for transit.

THE COST We can't quote a repair without first seeing the machine. Parts are charged the same price you will find on our website, plus labor and shipping, and sales tax where applicable. If your machine isn't sent to us securely, there is a \$15.99 charge for brand new secure packaging. Labor rates vary and are dependent upon the repairs that need to be made and the overall size of the job. Call for more information!

NEED TO UPGRADE? If your machine is fine but you want to upgrade it, we can do that for you too! See page 8 for more information on machine conversions and upgrades. Much like repairs, parts are charged the same price you will find on our website, plus labor and shipping, and sales tax where applicable. We can install any and all new accessories on your machine that you would like!

ORDERING EXAMPLE: You have a single punch machine with Schlage capabilities. You want to be able to punch the Kwikset keyway. Order everything in the **RY2000KW** row, EXCEPT the RY2007 vise jaw. Your machine already has the RY2007 since you have the parts that correspond with Schlage. You will keep Schlage set up on the right side of your RY2000, and Kwikset set up on the left. When switching between the keyways, you will only need to swap out the space bar! Same goes with the RH or LH Depth driver - no need to purchase duplicates.

10 Piece Lock Pick Set with "MINI-Blue"™ Miniature Tipped Picks.

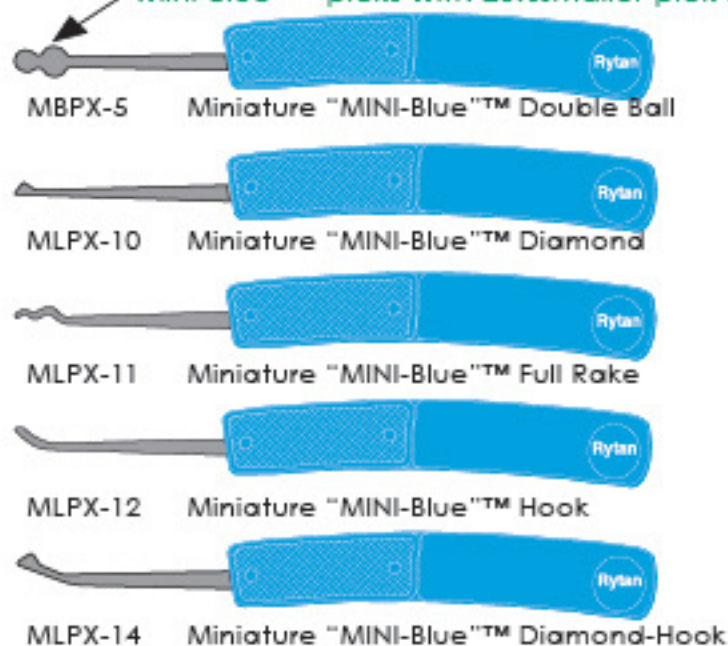

\$40.34 Suggested Retail Price
MUST BE PURCHASED FROM YOUR DISTRIBUTOR

The miniature Rydan "Mini-Blue"™ lock picking instruments found in this special set are a new concept in picking tools! The pick blades are scaled down by 20% compared to traditional size picks — making them ideal for opening locks with small keyways. Great for keyway grooves that restrict the movement of regular tools. Includes our small pick case.

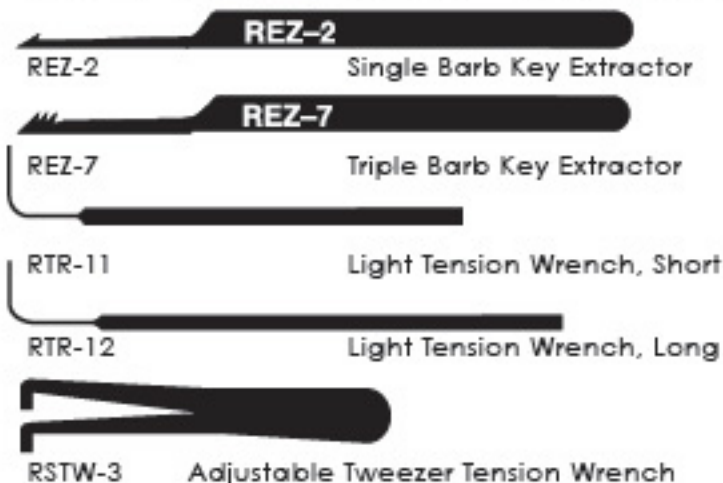

Rydan's exclusive highly break resistant Stainless Steel pick blades with injection molded "fused" handles that transmit just the right "tactile" feel when you pick open a lock, have been a RYTAN exclusive since 1984!
